THE AGREEMENT DATASETS

Dataset Structure

The agreement dataset is structured into four substantive sections;

Agreement info
Basic information on the agreements e.g. titles, relevant dates, signatory states and states parties.

Complemented by the secondary dataset; The agreement Parties data set (country/year)

Obligations & Rights
Weapon-Specific Obligations, Facility-Specific Obligations, General Obligations, and rights formulated by the agreement.

Complemented by the secondary dataset; Weapons & Facilities.

Consultation & Control
Mechanisms of Consultation, Demonstrated Compliance, and Verified Compliance, formulated by the agreement.

Complemented by the Secondary datasets: Consultation, Demonstrated Compliance and the Verified Compliance.

Agreement associations:
Associations and organizations established or utilised by the agreement.

Complemented by the secondary dataset Agreement Associations.

UNIT OF ANALYSIS

The unit of analysis in the agreement dataset is the officially published document constituting the basis for any and all arms control agreements. See the definitions compendium for more information.

The agreement data set observed all categories of arms-control, with regards to categories of weapons. Consult Annex 1 for a full list of observations.

Read more about us and our work at
www.uu.se/alvamyrdalcentre.

AMC

SECONDARY DATASETS

The secondary datasets can be manually merged with the agreement dataset or used separately.

Weapons & Facilities
The unit of analysis is the weapon or facility constituting the item of regulation; either restricted or banned. Connected to the agreement data set via the agreement id.

Consultation
The unit of analysis is the consultation mechanism, connected to the agreement set via the agreement id.

Demonstrated Compliance
The unit of analysis is the demonstrated compliance mechanism, connected to the agreement data set via the agreement id.

Verified Compliance
The unit of analysis is the verified compliance mechanism, connected to the agreement data set via the agreement id.

Agreement Associations
The unit of analysis is the agreement association, connected to the agreement data set via the agreement id.

The Land/Year State-parties data set
The unit of analysis is every country in the GWNO system between the years of 1914-2024.

Agreement Dataset

DEFINITIONS COMPENDIUM

The definitions compendium outlines the relevant concepts and typologies underlying the agreement dataset.

The Pelindaba Treaty is utilised as an example agreement to demonstrate definitions and concepts throughout the definitions compendium.

PREFACE

Arms Control Agreements and Type of Documents

Arms Control Agreements

The unit of analysis in the dataset is any officially published document constituting the written basis for an arms control agreement.

The term arms control agreement is understood, first, as any legal instrument between two or more states banning or restricting the development, testing, production, possession, stationing, transfer, use or disposal of any weapon.

Examples: Non-Proliferation Treaty, INF Treaty, ATT, CWC, BWC, CCW.

Second, as any unilateral declaration by a state banning or restricting the development, testing, production, possession, stationing, transfer, use or disposal of any weapon.

Examples: the Nuclear-Weapon-Free Status of Mongolia, unilateral declarations to suspend nuclear weapons testing.

Third, as any legal instrument between two or more states enabling or enhancing transparency or access with regards to a state's current or future arms possession or policy.

Examples: Hot Line Agreements, Open Skies.

The agreement dataset observes all categories of arms control with regard to categories of weapons. Consult Annex I for a full list of observations.

Primary documents, attached documents, and associated documents

Agreements observed in the agreement dataset are considered either a primary document or an associated document.

Primary Documents

The primary document of an agreement is the main title document.

The title document and other attached documents (annexes, protocols, memorandums) signed simultaneously as the title document are considered the combined material constituting the written basis for a primary agreement.

Associated Documents

Documents attached to a primary document later than at the signing of the primary document, or documents formulating parallel obligations to a primary document specifically intended for nuclear-weapon states, are considered associated documents and a stand-alone observation in the datasets.

Associated documents are understood as relating to one of three categories;
I. Associated document adding to the primary document after signing.
II. Associated document amending/updating the primary document after signing.

III. Associated document formulating parallel obligations to a primary document specifically intended for nuclear-weapon states.

The Pelindaba Treaty title document, including Annex I, II, III and IV, is considered the primary agreement constituting one observation in the dataset. Protocols 1,2,3 are observed as separate observations, each considered an associated document formulating parallel obligations to a primary document specifically intended for nuclear-weapon states.

SECTION I
Agreement Information

Adoption

"Adoption" is the formal act by which the form and content of a proposed treaty text are established. As a general rule, the adoption of the text of a treaty takes place through the expression of the consent of the states participating in the treaty-making process.

Treaties that are negotiated within an international organization will usually be adopted by a resolution of a representative organ of the organization whose membership more or less corresponds to the potential participation in the treaty in question. A treaty can also be adopted by an international conference which has specifically been convened for setting up the treaty, by a vote of two thirds of the states present and voting, unless, by the same majority, they have decided to apply a different rule. [Art.9, Vienna Convention of the Law of Treaties 1969] (UNTC, Glossary of terms relating to Treaty actions, UNTC)"

AMC Data identifies adoption by the expression of consensus on the agreement content in a resolution-producing forum prior to the opening of signature. Resolutions of endorsement post-opening of signature are not considered.

Signature, Signature subject to ratification, and Signature of an agreement reached

"Definitive Signature: When the treaty is not subject to ratification, acceptance or approval, "definitive signature" establishes the consent of the state to be bound by the treaty. Most bilateral treaties dealing with more routine and less politicized matters are brought into force by definitive signature, without recourse to the procedure of ratification [Art.12, Vienna Convention on the Law of Treaties 1969] (UNTC, Glossary of terms relating to Treaty actions, UNTC)."

"Signature Subject to Ratification, Acceptance or Approval:
Where the signature is subject to ratification, acceptance or approval, the signature does not establish the consent to be bound. However, it is a means of authentication and expresses the willingness of the signatory state to continue the treaty-making process. The signature qualifies the signatory state to proceed to ratification, acceptance or approval. It also creates an obligation to refrain, in good faith, from acts that would defeat the object and the purpose of the treaty [Arts.10 and 18, Vienna Convention on the Law of Treaties 1969] (UNTC, Glossary of terms relating to Treaty actions, UNTC)."

AMC Data identifies the opening of signature and type of signature (definitive or subject to ratification) by explicit mention. A signature not explicitly definitive or subject to ratification is considered a Signature of an agreement reached.

Ratification

"Ratification defines the international act whereby a state indicates its consent to be bound to a treaty if the parties intended to show their consent by such an act.

In the case of bilateral treaties, ratification is usually accomplished by exchanging the requisite instruments, while in the case of multilateral treaties the usual procedure is for the depositary to collect the ratifications of all states, keeping all parties informed of the situation. The institution of ratification grants states the necessary time-frame to seek the required approval for the treaty on the domestic level and to enact the necessary legislation to give domestic effect to that treaty [Arts.2 (1) (b), 14 (1) and 16, Vienna Convention on the Law of Treaties 1969] (UNTC, Glossary of terms relating to Treaty actions, UNTC)"

"The instruments of "acceptance" or "approval" of a treaty have the same legal effect as ratification and consequently express the consent of a state to be bound by a treaty. In the practice of certain states, acceptance and approval have been used instead of ratification when, at a national level, constitutional law does not require the treaty to be ratified by the head of state [Arts.2 (1) (b) and 14 (2), Vienna Convention on the Law of Treaties 1969] (UNTC, Glossary of terms relating to Treaty actions, UNTC)."

"Accession" is the act whereby a state accepts the offer or the opportunity to become a party to a treaty already negotiated and signed by other states. It has the same legal effect as ratification. Accession usually occurs after the treaty has entered into force. The Secretary-General of the United Nations, in his function as depositary, has also accepted accessions to some conventions before their entry into force. The conditions under which accession may occur and the procedure involved depend on the provisions of the treaty. A treaty might provide for the accession of all other states or for a limited and defined number of states. In the absence of such a provision, accession can only occur where the negotiating states were agreed or subsequently agree on it in the case of the state in question [Arts.2 (1) (b) and 15, Vienna Convention on the Law of Treaties 1969] (UNTC, Glossary of terms relating to Treaty actions, UNTC)."

Entry into force

"Typically, the provisions of the treaty determine the date on which the treaty enters into force. Where the treaty does not specify a date, there is a presumption that the treaty is intended to come into force as soon as all the negotiating states have consented to be bound by the treaty. Bilateral treaties may provide for their entry into force on a particular date, upon the day of their last signature, upon exchange of the instruments of ratification or upon the exchange of notifications. In cases where multilateral treaties are involved, it is common to provide for a fixed number of states to express their consent for entry into force. Some treaties provide for additional conditions to be satisfied, e.g., by specifying that a certain category of states must be among the consenters. The treaty may also provide for an additional time period to elapse after the required number of countries have expressed their consent or the conditions have been satisfied. A treaty enters into force for those states which gave the required consent. A treaty may also provide that, upon certain conditions having been met, it shall come into force provisionally [Art.24, Vienna Convention on the Law of Treaties 1969] (UNTC, Glossary of terms relating to Treaty actions, UNTC)."

AMC Data identifies entry into force of an agreement by the fulfillment of explicitly regulated conditions for entry into force. Entry into force for agreements not regulating such procedures are not interpreted by AMC Data. AMC Data considers four agreement formats.

I. No explicitly regulated terms of entry into force.
The agreement does not specify terms and conditions for entry into force. The agreement is jointly published and potentially signed but does not specify conditions for the formal expression of consent to be bound.

II. Attached document explicitly seen as an integral part of an agreement entered into force.
Upon joint publishing, the agreement is explicitly seen as integral (holding the same legal effect as the primary agreement) to a primary agreement already in force. Consent to be bound is expressed at the point of joint publishing.

III. Explicit entry into force upon signature.
The agreement explicitly enters into force upon signature. The signature is definitive; consent to be bound is expressed directly at the signature. .

IV. Explicit entry into force upon ratification (accession/succession/consent to be bound) of signature.
The agreement requires the ratification of one or more signatures for entry into force. The signature is subject to ratification; consent to be bound is expressed at the deposit of an instrument of ratification.

Withdrawal

Withdrawal is understood as the formal state exit from an agreement, after which a state is no longer bound by agreement obligations. AMC Data considers conditions and procedures for withdrawal of agreements by explicit regulation, and does not interpret withdrawal of states unless formal conditions and procedures are fulfilled.

Agreement parties, Signatory states & Participatory states

AMC Data considers all states having expressed consent to be bound by an agreement, either by the joint publishing of an associated document explicitly seen as an integral part of an agreement entered into force, definitive signature, or deposit of ratification (or another type of deposit of equal legal effect) to be parties to an agreement.

States that signed an agreement prior to its entry into force or have signed an agreement subject to ratification but have yet to ratify the signature are considered signatory states to an agreement.

States that are not agreement parties or signatory states, given AMC Data definitions, are considered to be Participatory states to an agreement.

Agreement Status

AMC Data evaluates the status of an agreement given six categories.

I. In force
An agreement is considered in force when it comes into effect under explicit conditions and terms. As long as it has not formally expired, been formally terminated, or become obsolete since its inception, given AMC Data definitions, it is understood as remaining in force.

**Relevant developments and ambiguities surrounding agreements "In force" given AMC Data definitions are commented under Agreement profiles on amcdata.uu.se.*

II. Formally terminated
An agreement is considered formally terminated upon a terminating state withdrawal.
**In bilateral cases, the formal withdrawal of one party is, by definition, a terminating withdrawal, formally terminating the agreement.*
**In Multilateral cases, a state party's withdrawal, dissolving other parties' possibilities to implement agreement obligations, is considered a terminating withdrawal, formally terminating the agreement.*

III. Formally expired
Formally expired agreements are understood as either expired, given explicit conditions regulated by the agreement, or superseded, given explicit conditions regulated by the agreement.

IV. Obsolete
An agreement is considered obsolete in either case of significant, sustained violations of agreement obligations or as the result of significant, sustained

geopolitical shifts, effectively dissolving the continued implementation of the agreement.

V. Never Entered into force
An agreement is considered never to have entered into force given a signed agreement for which the effort to fulfill the conditions for entry into force failed. Since the failure to bring the agreement into effect, one or more subsequent agreements with the same state participation, substance, or scope have formally entered into force.

VII. Yet to enter into force
An agreement is considered yet to have entered into force given a signed agreement for which the effort to fulfill the conditions for entry into force are ongoing. No subsequent agreements with the same state participation, substance, or scope have formally entered into force.
.

AMC Data Agreement format index

Format	No explicitly regulated terms of entry into force	Attached document explicitly seen as integral part of an agreement entered into force	Explicit entry into force upon signature	Explicit entry into force upon ratification (accession/succession/ consent to be bound) of signature	Explicit entry into force upon ratification (accession/succession/ consent to be bound) of signature
Defined by;	No explicit regulation of definitive signature or signature subject to ratification (as the basis for entry into force)	Explicit formulation of attached document seen as integral part/part of an agreement entered into force	Explicit regulation of entry into force upon definitive signature	Explicit regulation of entry into force upon (procedure of) ratification of signature	This Treaty shall be open for signature by any State in the African nuclear-weapon-free zone. It shall be subject to ratification (Article 18:1)
Signed	Potentially signed, although signature is not explicity definitive or subject to ratification	No	Yes, definitive signature	Yes, signature subject to ratification	Yes, This Treaty shall be open for signature by any State in the African nuclear-weapon-free zone. It shall be subject to ratification (Article 18:1)
Signatory States	No	No	No	Yes, Signatory states upon signature and prior to entry into force.	Yes, signatory states upon signature and prior to entry into force.
Entry into Force	No	Yes, entry into force upon joint publication	Yes, entry into force upon signature	Yes, upon regulated terms of conditions	Yes, upon the date of deposit of the twenty-eighth instrument of ratification (Article 18:2).
Parties	No, participants to active agreement	Yes, parties upon joint publication	Yes, parties upon signature	Yes, parties upon ratification of signature of an agreement having entered into force, or by accession/succession	Yes, states having ratified the agreement.

SECTION II
Obligations & Rights

Agreement Obligations

AMC Data understands agreement obligations as any and all actions states are to commit to or refrain from, as required by the observed agreement.

Agreement obligations are observed at the level of the state.

Obligations identified by AMC Data are understood as either Weapon-Specific, Facility-Specific, or General.

Note: Participation with agreed measures in relation to mechanisms of consultation and control, as an obligation, is assumed and considered a constant across agreements.

Weapon-specific Obligations

A Weapon-specific obligations are understood as a weapon (weapon material or weapon technology) explicitly banned or restricted in relation to its development, testing, production, acquisition, possession, transfer, stationing, use or disposal.

The weapon subject to obligations is observed at the level of specificity formulated by the agreement (e.g. *ICBM launchers*, or *Training-launchers for ICBMs*).

In the event of obligations being placed on multiple levels of aggregation in terms of the category of that weapon within the same agreement (e.g. obligations are placed on both *ICBM launchers* and *Training-launchers for ICBMs*), obligations placed on an aggregated category of a weapon are not transferred to "sub-categories" of the same weapon by assumption (e.g. obligations placed on *ICBM launchers* are not transferred to *Training-launchers for ICBMs* by assumption).

Summary Categories

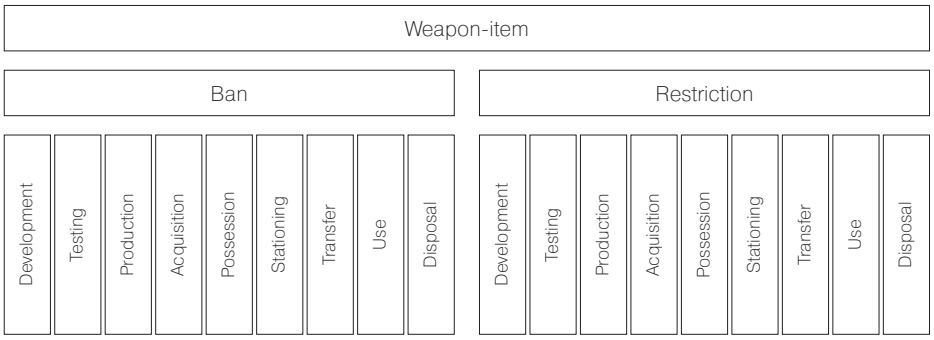
Weapon-specific obligations are summarized under fictional summary categories, organizing all weapon-specific obligations of an agreement under corresponding categories of weapons considered by AMC Data (e.g. obligations for ICBM launchers* and *Training-launchers for ICBMs summarized/combined as a fictional Weapon-specific Obligation under *ICBM Launchers*). Categories considered for all agreements include:

A. Nuclear Weapons
B. Conventional Weapons Land
C. Conventional Weapons Sea
D. Conventional Weapons Air
E. Biological Weapons
F. Chemical Weapons
G. Intercontinental Ballistic Missiles (ICBMs)
H. Submarine-launched Ballistic Missiles (SLBMs)
I. ICBM Launchers
J. SLBM Launchers
K. Heavy Bombers
L. Nuclear Submarines

Weapons Phases, Bans & Restrictions

A Weapon-specific Obligation, meaning a banned or restricted weapon, is understood as located in one or more specific phases with regard to a state's control of that weapon. A weapon can be banned or restricted in relation to its development, testing, production, acquisition, stationing, possession, transfer, use, or disposal of that weapon. See the Weapons Phases index page 14 for more information.

AMC Data Weapons Phases index



Development	The research/development of the weapon/weapons-technology/material. **Bans/restrictions placed on conversion and modernization are categorized under Development.*
Testing	The testing of an assembled weapon/item/material prototype.
Production	The production, manufacturing, assembly of a weapon/item/material.
Acquisition	The acquiring of the weapon/item/material by receiving/purchase for possession and control of the item.
Possession	The stockpiling, holding, storage of the weapon. Deployed, non-deployed or in a general sense.
Stationing	The stationing/placement of a weapon on another parties' territory, maintaining control of the weapon.
Transfer	The giving over of control via sale, gift, trading of the weapon.
Use	The use, employment of the weapon.
Disposal	The disposal/placement/handling of a used weapon.

A ban is understood as the complete prohibition or intolerance of the execution of a phase with regard to a particular weapon.

A restriction is understood as a limited or conditional tolerance of the execution of a phase with regard to a particular weapon.

A Weapon-specific Obligation can be located in both restricted and banned phases, although one phase cannot be both banned and restricted.

Restriction Specification

A restriction is understood as specifying a set of tolerated conditions for the execution of a phase with regard to a particular weapon. AMC Data considers parties, facilities, locations, qualities or quantities as potential features of a state's management of weapons as the basis for formulating a restriction.

I. Parties
The execution of a phase with regard to a weapon is restricted to/from specified parties. Example: The possession of the weapon is restricted to the P5 states only.

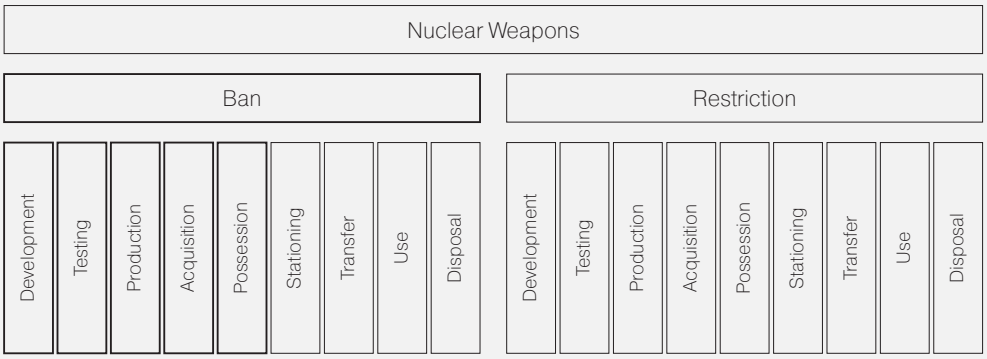
II. Location
The execution of a phase with regard to a weapon is restricted to/from a specified location. Example: The development of the weapon is restricted to national territories.

III. Facilities
The execution of a phase with regard to a weapon is restricted to/from specified facilities. Example: The Possession of the weapon is restricted to training sites.

IV. Quality
The execution of a phase with regard to a weapon is restricted to/from a specified qualitative measure relating to the state practices or weapons capability. Example: The use of the weapon is restricted from specifically

PELINDABA

Example of a Weapon-specific Obligation, applying to (I) Nuclear weapons, formulating (A) a Development-ban, (B) a Testing-ban, (C) a Production-ban, (D) an Acquisition-ban, and (E) a Possession-ban.
*Note: The following is a segment of obligations applied to Nuclear Weapons in the Pelindaba Treaty to illustrate an example.



Article 3.A. Each Party undertakes not to conduct research on, develop, manufacture, stockpile or otherwise acquire, possess or have control over any nuclear explosive device by any means anywhere.

targeting civilian populations (see quality-specific restrictions for more information).

V. Quantity
The execution of a phase with regard to a weapon is restricted to a specified quantity. Example: The possession of the weapon is restricted to 700 (see quantity-specific restrictions for more information).

Quality-specific Restrictions

A quality-specific restriction entails some type of qualitative limitation of the execution of a phase with regard to the weapon. Quality-specific restrictions are understood as related to two central categories;

I. Capabilities
The execution of the phase is restricted to/from certain capabilities of a weapon. Example: The testing of ICBMs is restricted to flight-testing with max three warheads.

II. Practice
The execution of the phase is restricted to/from certain practices of states with regard to the weapon. Example: The transfer of Aircrafts is restricted to states subject to transfer controls only.

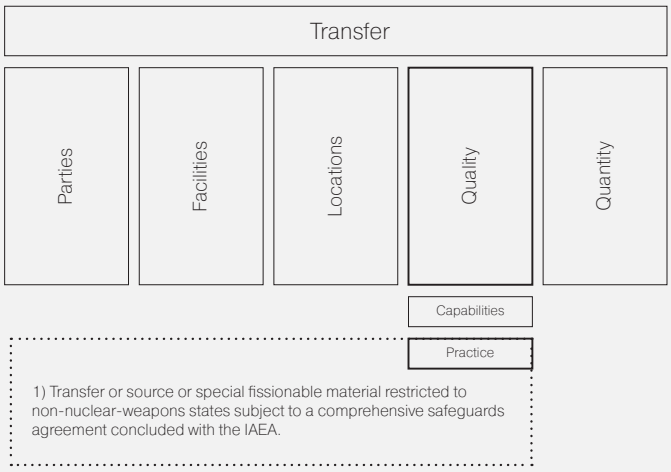
Quantity-specific Restrictions

A quantity-specific restriction entails a quantitative limitation of the execution of phase with regard to the weapon. Quantity-specific restrictions relate directly to quantities of entire weapons, not quantities of capabilities of that weapon (e.g. "The deployment is restricted to five ICBMs equipped with three warheads", not "The testing of ICBMs is restricted to flight-testing with max three warheads"). Three types of quantity-restrictions are considered.

I. Sole quantity
One weapon is counted towards a sole quantity. Example: Parties may deploy no more than 700 ICBMS.

PELINDABA

Example of a Weapon-specific Obligation, applying to (II) Fissile Material, formulating a Quality-specific Transfer-restriction.
*Note: The following is a segment of obligations applied to Fissile Material in the Pelindaba Treaty to illustrate an example.



Article 9.c. Not to provide source or special fissionable material, or equipment or material especially designed or prepared for the processing, use or production of special fissionable material for peaceful purposes to any non-nuclear-weapon State unless subject to a comprehensive safeguards agreement concluded with IAEA.

II. Aggregated quantity
Multiple weapons are counted towards a combined aggregate quantity. An aggregated quantity can offer a varying amount of flexibility in terms of the composition within the aggregated quantity. Example: Parties may deploy no more than 3800 warheads attributed to deployed ICBMs, deployed SLBMs, and deployed heavy bombers.

III. Aggregated throw weight
Multiple weapons are counted towards a combined aggregated throw weight.

Type of Execution

In the case of a banned phase, four types of executions with regards to the banned phase are considered as potentially specified by the agreement.

I. Grant Assistance
Banning the granting of assistance/encouragement to other states parties in relation to the phase

II. Gain Assistance
Banning the receiving of assistance or encouragement from other states parties in relation to the phase

III. Permission
Banning the permitting/acceptance/allowance of execution of the phase within state territory from other states parties

IV. Execution
Banning the state-execution of the phase.
**Unless specified otherwise, execution of the phase in the case of a ban is assumed.*

Facility-specific Obligations

Facility-specific obligations are understood as obligations placed directly upon a facility. AMC Data considers three types of facility-specific obligations;

I. Facility destruction
The obligation requires the destruction of the facility/facility-type

II. Facility conversion
The obligation requires the conversion of the facility/facility-type

II. Facility use
The obligation permits only a specific use of the facility/facility-type

General Obligations

Obligations not weapon or facility-specific are observed under General Obligations. AMC Data identifies nine categories of general obligations.

I. Domestic measures adoption
Obligations relating to the adoption or maintenance of domestic legislation or enforcement of domestic laws.

II. Communication
Obligations relating to the adoption or maintenance of communication technologies.

III. Domestic authorities/personnel adoption
Obligations relating to the adoption/maintenance of national authorities, domestic points of contact or national agencies/organizations.

IV. Negative assistance
Obligations relating to the negative assistance with regard to the general violation of the agreement as a whole.

V. Positive assistance
Obligations relating to providing other state parties with general assistance with regard to the implementation of the agreement.

VI. Cooperation
Obligations relating to general state party cooperation *with regard to the implementation of the agreement.*

VII. Agreement adoption
Obligations relating to the adoption/maintenance of external agreements.
**Agreement to pursue future agreements is included.*

VIII. Human/environmental protection
Obligations relating to the protection of the environment and/or humans.

IX. Experience and training exchange
Obligations relating to the exchange of experience and training with regard to the general implementation of the agreement.

Rights

AMC Data specifically observes rights formulated by the observed agreement with regards to peaceful uses of military technology restricted or banned by the agreement. Rights are identified by explicit mention.
**The right to participate in measures of consultation and control is assumed and considered a constant across agreements.*

SECTION III
Consultation & Control

Consultation and Control

Procedures and measures regulated by an agreement to consult or control the implementation of compliance are identified as either a mechanism of consultation, demonstrated compliance or verified compliance.

Mechanisms

A mechanism is understood as an established process by which measures of consultation, demonstrated compliance or verified compliance are activated and executed as formulated by the agreement. A mechanism is observed through procedural and substantial components.

Procedural Components

Procedural components observe the mechanism in time, identifying the initiation, duration and activation of the mechanism.

I. The initiation, referring to the point after entry into force after which the mechanism is potentially activated;

II. The duration, referring to the point in time after entry into force the mechanism remains potentially activated and;

III. The Trigger/activator, referring to the specified conditions to activate the mechanism within its observed duration.
Substantial Components

Substantial components refer to the contents or substance of an

activated mechanism: parties, associations, places, and objects affected in the case of activation.

Consultation Mechanisms

A Consultation Mechanism is understood as any established process formulated by the agreement outlining two, several or all state parties to an agreement mutually consulting, considering, or discussing any general or specified topic relating to the agreement.

Consultation mechanisms are identified by a consultation topic* being assigned to a State-party Assembly** or to parties directly for consideration.
*See Consultation Type.
**See Section V: Agreement Associations.

Procedural components

Consultation is understood as inherently connected to a forum. Consultation occurs between two or more parties, either in an assigned state party forum or between parties directly (party-to-party/ diplomatic channels).

Procedural components for consultation mechanisms will either depend on the procedures for convening a state-party forum into assembly or on the mutual agreement required for direct consultation between parties.

Initiation, duration, activation

Consultation Mechanisms between parties directly are understood as, by definition, initiated at the point of entry into force, activated upon mutual agreement, and available for the entire duration of the agreement.

Consultation Mechanisms assigned to a forum are initiated, activated, and hold the same duration as the assigned forum.

Consultation Topic

AMC Data considers nine consultation topics as the basis for identifying Consultation Mechanisms.

I. Implementation Consultation
General/unspecified implementation consultation is either assigned to a State-party Assembly or to parties directly.
**Implementation consultation is assumed with the establishment of a State-party Assembly if no explicit topic is assigned.*

II. Review Consultation
The explicit topic of implementation/agreement review is either assigned to a state-party assembly or to parties directly.

III. Amendment Consultation
The explicit topic of agreement amendments to the agreement is either assigned to a State-party Assembly or to parties directly.

IV. Withdrawal Consultation
The explicit topic of a state party withdrawal from the agreement is either assigned to a State-party Assembly or to parties directly.

V. Technological Developments Consultation
The explicit topic of Technological developments, or agreement improvements, is either assigned to a State-party Assembly or to parties directly.

VI. Extraordinary Consultation

General/unspecified extraordinary consultation/consultation under unspecified, extraordinary circumstances is either assigned to a State-party Assembly or to parties directly.*

**Extraordinary Consultation is assumed with the establishment of a Special/ extraordinary session of State-party Assembly if no other explicit topic is assigned.*

VII. Party-dispute Consultation
The explicit topic of disputes between parties is either assigned to a State-party Assembly or to parties directly.

VIII. Interpretation-dispute Consultation
The explicit topic of ambiguities on agreement text/terms is either assigned to a state-party assembly or to parties directly.

IX. Compliance-dispute Consultation
The explicit topic of ambiguities on state-party compliance is either assigned to a state-party assembly or to parties directly.

Consultation Type

Consultation topics are grouped under two types of consultation.

I. Operations and Maintenance Consultation. Consultation relating to the general consideration of operations, up-keep, maintenance or status of the agreement. (Implementation Consultation, Review Consultation, Amendment Consultation, Withdrawal Consultation, Technology/improvements Consultation)

II. Ambiguity and Dispute Consultation. Consultation relating to the extraordinary/special consideration of ambiguity or the dispute between state parties (Extraordinary Consultation, Party dispute Consultation, Interpretation dispute Consultation, Compliance dispute Consultation).

Demonstrated Compliance Mechanisms

Demonstrated Compliance Mechanisms are understood as any established process formulated by the agreement involving one or more states submitting information to other states-parties/mandated Agreement Association as required by the agreement.

**Procedural communications related to the logistics of verification are not considered; rather, information related to the possession or practice of weapons.*
Notification submitted within 30 days of entry into force, disclosing a list of inspectors - not considered.
Notification submitted ten days prior to the launch of a weapon - considered.

Initiation, duration, activation

Demonstrated compliance mechanisms are understood as initiated directly upon entry into force or at a specified, set time following entry into force.
*If no indication is given otherwise, initiation directly upon entry into force is assumed.
*if a mechanism is observed with the objective; initial, mechanisms of the same agreement with the objective; updated, are assumed initiated following initial submission.

Demonstrated compliance mechanisms are understood as either holding a set, specified duration, or as available for the life of the agreement.
*If no indication is given otherwise, agreement-duration is assumed.
*If a mechanism relates directly to an implementation deadline, the deadline of implementation is observed as the duration of the mechanism e.g. notifications of elimination are assumed completed after a specified period of elimination is completed.

Demonstrated compliance mechanism trigger

The Demonstrated Compliance Mechanism trigger observes conditions for activating the mechanism within its observed duration.

I. Agreement trigger
Understood as regulated by the agreement at entry into force. An agreement-triggered mechanism is activated either on a set cycle, by a set quota, activated continuously or one time. Example: States-parties are required to report annually to other states-parties.

II. State-party action trigger
Understood as a specified action committed by a state party activating the mechanism. A state-party triggered mechanism is activated either at the state-party intention to commit, initiation of, or completion of, a specified action. Example: States-parties are required to submit a notification at the intention to launch a missile.

III. State-party request trigger
Understood as activated upon a state-party request to activate the mechanism. *Example: State-parties are required to submit information upon a state-party request.*

IV. Event trigger
Understood as a specified event activating the mechanism, most often an event outside the control of state-parties. Example: State-parties are required to notify immediately in the event of detection of an unknown object by missile detection systems.

V. Agreement Association trigger
Understood as a an Agreement Association/organization by decision activating the mechanism. Example: State-parties are required to submit information if the Meeting of State-parties Extraordinary Session so decides.

Demonstrated Compliance Mechanism type

The Demonstrated Compliance Mechanism type observes the type of content disclosed by an activated mechanism.

I. Compliance submission
Understood as disclosing information points directly relating to a restriction or ban of Weapon-items, Facility-specific Obligations or General obligations; information on a state's arms-possession, activities, or policy. Example: Elimination-notification, Implementation-report, Data-exchange.

II. Transparency submission
Understood as disclosing information points not relating to a restriction or ban of Weapon-items, Facility-specific Obligations or General obligations, although offering transparency into activities and policy unavailable to state-parties was it not for the agreement. Example: Scientific Findings-report, Scientific Plans-report, Best Practices-report.

Demonstrated compliance format

The demonstrated compliance format describes the format of exchange when submitting information to other state parties, either as an exchange or submission of information.

Information-exchanges are *required by all parties, collectively submitted upon mechanism activation.*

I. Report
A report is understood as the same information collectively reported at the same point in time, covering a specified period of time, to the same forum.
** the same information collectively reported at the same point in time, covering a*

specified period of time exchanged between to parties is consiered an Infromation-exchange.

II. Information-exchange
An Information-exchange is understood as the same information points exchanged between two parties at the same point in time.

Information-submissions
Required by all parties, individually submitted upon mechanisms activation.

III. Information-submission
An Information-submission is understood as any submission of information to other party(ies) or mandated assosiation, required by an individual state-party given specified conditions.

IV. Notification-submission
A Notification-submission is understood as any submission of information required by an individual state-party at the intention to carry out, initiate, or at the completion of, a specified activity (or immediately in the case of a defined event).

Demonstrated Compliance Objective

The Demonstrated Compliance Mechanism objective identifies the motivation behind declaring information in the course of implementing obligations under an agreement.

I. Initial Submission
Submissions disclosing information to declare the initial state of a set of defined data points/categories of information relating to agreement obligations.

II. Updated submission
Submissions disclosing information to declare on-going, progressed or continued compliance with agreement obligations, given time passed or an event occurring.

III. Challenged submission
Submissions disclosing information to defend compliance given arisen doubts or suspicions of a state's non-compliance with agreement obligations.

Notification Objective

Demonstrated Compliance Mechanisms observed under format as notifications are understood as, by definition, indicating the intention to, initiation or completion of, a specified activity (or immediately in relation to a specified event).

I. Intended
The notification is submitted at the intention of carrying out (planning or scheduling) a specified activity. The time prior to the initiation at which the notification is to be submitted is specified.

II. Initiated
The notification is submitted at the initiation of a specified activity.

III. Completed
The notification is submitted after the completion of an activity. The time after completion at which the notification is to be submitted is specified.

IV. Immediate
The notification is submitted immediately in the case of a specified event/ situation.

Demonstrated Compliance Mechanism submission

Specific information disclosed upon activating a Demonstrated Compliance Mechanism is organized under the weapons phases used to describe Weapon-specific Obligations. Information can be disclosed relating to multiple phases. **The fictional phase of "implementation" is applied if the phase related to the information to be disclosed is unspecified, unidentifiable or general.*

AMC Typology

The AMC typology combines the mechanism objective, submission and format to construct a comparable typology over different Demonstrated Compliance Mechanisms.

AMC Demonstrated Compliance typology;

Objective	+	Transparency		+	Format
		Event			
		Implementation	*In the case of compliance submission, if identifiable, the specific phase, or activity relating to that phase is used.*		
		Development	*Conversion, modernization*		
		Testing			
		Production			
		Acquisition			
		Possession	*Deployment, domestic transit, elimination, destruction, quantities/numbers, capabilities*		
		Stationing			
		Transfer			
		Use	*Launch, exercise*		
		Disposal			

Verified Compliance Mechanisms

A verified compliance mechanism is understood as any process established by the agreement involving a state/mandated Agreement Association to, in person or by technological means remotely, access areas, locations and objects with regards to another state's arms-possession or activities.

Initiation, duration, activation

Verified Compliance Mechanisms are understood as initiated directly upon entry into force, or at a specified, set, time following entry into force.
*If no indication is given otherwise, initiation directly upon entry into force is assumed.
*if a mechanism is observed with the objective; initial, mechanisms of the same agreement with the objective; updated, are assumed to be initiated following initial inspections.

Verified Compliance Mechanisms are understood as either holding a set, specified duration, or as available for the life of the agreement.
*If no indication is given otherwise, agreement-duration is assumed.
**If a mechanism relates directly to an implementation deadline, the deadline of implementation is observed as the duration of the mechanism, e.g. inspections of elimination, are assumed completed after a specified period of elimination is completed.

Verified Compliance Mechanism Trigger

The Verified Compliance Mechanism trigger observes conditions for activating the mechanism within its observed duration.

I. Agreement trigger
Understood as regulated by the agreement at entry into force. An agreement-triggered mechanism is activated either on a set cycle, by a set quota, activated continuously or one time. Example: Possesion-inspections are activated up to 10 times per calendar year.

II. State-party notification trigger
Understood as a specified notification submitted by a state-party activating the mechanism. Example: Elimination-inspections are activated upon a state-party notification of intention to eliminate a missile.

III. State-party request trigger
Understood as activated upon a state-party request to activate the mechanism. Example: Challenge-inspections are activated upon a state-party request.

IV. Event trigger
Understood as a specified event activating the mechanism. Example: Challenge-inspections are triggered in the event of an Update-inspection giving rise to doubts of compliance.

V. Agreement Association trigger
Understood as an Agreement Association/organization by decision activating a mechanism. Example: Challenge-inspections are activated by the decision of the Meeting of States Parties Extraordinary Session.

Verified Compliance Mechanism format

AMC Data identifies six types of Verified Compliance Mechanism formats, describing the type of access (to specified territories, facilities and objects) instituted by the mechanism.

Remote, inspectors are not present at the location of verification.

I. National technological means of verification (NTMs)
Commonly used National technological means of verification.
**Identified by explicit mention.*

II. Remote display
Open air display of objects for the purpose of enhancing observation by NTMs.

III. Remote monitoring
Static monitoring technology stationed at facilities for a prolonged time (without on-site stationed personnel), or measurement/surveillance from a remote location or air.
**Distinguished from NTMs by explicit mention.*

In-person, inspectors are present at the location of verification.

IV. In-person exhibition
Static exhibition/showcase of an object by visual observation of inspectors on-site.

V. In-person demonstration
Demonstration of the operational use of an object/technology by visual observation of inspectors on-site.

VI. In-person inspection
The active examination or investigation of an area, location, facility or object by visual observation, measurement, or interaction by inspectors on-site. Inspectors visit specified facilities for the period of time agreed for a single inspection, or for the duration of time associated with inspecting the completion of a process.

VII. In-person monitoring
The active examination or investigation of an area, location, facility or object by visual observation, measurement, or interaction by inspectors on-site. Inspectors are stationed at specified facilities for a prolonged time, continuously inspecting objects or activities.

Verified Compliance Objective

The Verified Compliance Mechanism objective identifies the motivation behind any given control of obligations in the course of implementing obligations under an agreement.

I. Initial confirmation
Confirmation/control of the initial state of a state-party's arms-possession or activities.

II. Updated confirmation
Confirmation/control of the continued, progressed, on-going state of a state-party's implementation of agreement obligations, given time passed, state-party actions taken or an event occurring.

III. Challenged confirmation
Confirmation/control of the current state of a state-party's implementation of agreement obligations, given arisen doubts or suspicions of non-compliance with agreement obligations.

IV. Completed confirmation
Confirmation/control of the completed state of a state-party's implementation of agreement obligations.

Verified Compliance Access

The level of access a Verified Compliance Mechanism entails is observed at three levels.

I. Area access
The territories, areas, or locations accessible to in-person/remote control.

II. Facility access
The facilities/type of facilities accessible to in-person/remote control.

III. Item access
The objects, structures, and information accessible to in-person/remote control.
.

Verified compliance confirmation

Details on what is confirmed during the activation of a Verified Compliance Mechanism is organised under the weapons phases used to describe Weapon-specific Obligations. One mechanism can confirm aspects relating to multiple phases.
**The fictional phase of "implementation" is applied if a phase of confirmation is unspecified, unidentifiable or general.*

AMC Typology

The AMC typology combines the mechanism objective, confirmation, and format to construct a comparable typology for different Verified Compliance Mechanisms.

AMC Verified Compliance Typology Index;

Objective	+	Implementation	*In the case of verified implementation, if identifiable, the specific phase, or activity relating to that phase is used.*	+	Format
		Development	*Conversion, modernization*		
		Testing			
		Production			
		Acquisition			
		Possession	*Deployment, domestic transit, elimination, destruction*		
		Stationing			
		Transfer			
		Use	*Launch, exercise*		
		Disposal			

SECTION IV
Agreement Associations

Agreement Associations

An Agreement Association is understood as any association explicitly partaking in the maintenance and/or control of an observed agreement to any extent.
*The term association is understood in its most generic sense, as two or more individuals organised as a group under a titled unit with a specified purpose.

Adopted domestic agencies, organisations or contact persons, as required by an agreement, are not considered an Agreement Association but rather a General Obligation relating to Domestic Measures Adoption.

Agreement Associations Nature

AMC Data considers two types of Agreement Association natures; associations established by the agreement and associations utilised by the agreement.

I. Agreement-established associations are understood as coming into existence with the agreement. The association did not exist prior to the agreement.

State-party Assemblies are assumed established by the agreement unless explicit mention of other origin is given.

II. Utilised associations are understood as existing prior to the agreement. An association is understood as utilised at the point of appointing the association with one or more mandates in relation to the maintenance or control of the agreement.

Explicitly utilising an individual secretary-general or director of an organization is assumed to entail the organization at the disposal of that individual.

Explicitly utilising the secretary-general of the United Nations is especially understood as utilising the United Nations secretariat at the disposal of the secretary-general of the United Nations.

Agreement Associations Type

AMC Data identifies four primary types of Agreement Associations.

I. State-party Assembly
A State-party Assembly is understood as an association explicitly regulated by the agreement to be convened in forum (meeting) one or more times during the agreement's life.

A State-party Assembly is composed of all, or a specified number of, state-parties. A State-party Assembly is understood as defined by its composition; alternations in the composition of a State-party Assembly indicate a different, distinct assembly.

A State-party Assembly is observed via one or multiple forums of the assembly, differentiated by the procedures of convening the assembly into a particular forum. Alternations in the conditions for assembly into forum indicate a different, distinct forum.

A forum is understood as possibly defined by multiple sessions, e.g., regular and extraordinary sessions. Alternations in the conditions for convening a session indicate a different, distinct session.

Distinct sessions are considered versions of the same forum, and procedures not explicitly specified in the event of a special/extraordinary forum session are assumed to be the same as those in a regular session.

A State-party Assembly is understood as governed during its assembly by an assembly chair.

A State-party Assembly's location is the location(s) of any given convened forum.

II. State-party Assembly Sub-organ

A State-party assembly sub-organ is a secondary group or unit of a State-party Assembly defined by its time-restricted existence upon explicit direction of a State-party Assembly.

Either state-parties or non-state-parties can constitute the composition, but the composition is either way specifically appointed by a State-party Assembly.

A State-party Assembly is understood as governed during time-restricted existence by a specified team/group leader.

A state-party Assembly Sub-organ is understood as not having an associated location.

III. State-party Organization

A State-party Organization is understood as an association in constant forum, in the form of an organization. It is composed of state-party representatives.

A State-party Organisation is understood as the governance of a secretary-general/chair.

A State-party Organisation's location is understood as the set and constant headquarters of the organisation.

IV. Non-state-party Organization

A Non-state-party Organisation is understood as a staffed association in constant forum, where staff are not the representatives of state-parties.

A Non-state-party Organisation is understood as the governance of a secretary-general/chair.

A Non-state party Organisation's location is understood as the set and constant headquarters of the organisation.

Association Mandate

The Association Mandate*is understood as the combined authority of the association across agreement implementation.

A Mandate is understood as any task or function related to the maintenance or control of the agreement explicitly appointed to an association. The level of authority in executing the task is observed as different types of mandates: Promotion Mandates, Facilitation Mandates, and Direction Mandates.

Promotion

Promotion is understood as any task relating to the general maintenance or administration of the agreement as a whole. The association is tasked with the general or specified promotion of the agreement.
(i) General Promotion
The association is tasked with the general/unspecified monitoring/over-seeing of agreement implementation.

(ii) Administrative Promotion

The association is tasked with the administrative support for any State-party-Assembly or information-circulation between state-parties.

(iii) Assistance Promotion
The association is tasked with assisting state-parties in agreement implementation and/or promoting the implementation assistance between state-parties.

(iiii) Information Promotion
The association is tasked with the production/distribution of agreement-specific information/knowledge production.

Facilitation

Facilitation is understood as the regulated authority to carry out a specified mechanism of consultation or control on behalf of the agreement. The association executes and invokes a specified mechanism on behalf of provisions regulated by the agreement and either constitutes a forum for a Consultation or Demonstrated Compliance Mechanism or constitutes the verifying party of a Verified Compliance Mechanism.

(i) The association is mandated to facilitate a Consultation Mechanisms.
The association constitutes the forum for a specified consultation mechanism.

(ii) The association is mandated to facilitate a Demonstrated Compliance Mechanism.
The association constitutes the forum for a specified Demonstrated Compliance Mechanism.

(iii) The association is mandated to facilitate a Verified Compliance Mechanism.
The association constitutes the verifying party on behalf of a Verified Compliance Mechanism.

Direction

Direction is understood as the regulated authority to direct a consultation or control mechanism as the association determines. The association executes and invokes a specified mechanism at its own direction and decides when and how it is to be invoked. The association can convene a State-party Assembly into forum, require the submission of a Demonstrated Compliance Mechanism or authorise a Verified Compliance Mechanism.

(i) The association is mandated to direct a Consultation Mechanism.
The association is authorised to convene a State-party Assembly into forum at its own direction

(ii) The association is mandated to direct a Demonstrated Compliance Mechanism.
The association is authorised to require submissions of information at its own direction.

(iii) The association is mandated to direct a Demonstrated Compliance Mechanism.
The association is authorised to set up an inspection/fact-finding mission at its own direction.

The Agreement Information Dataset list of variables

Variable Name	*Content*	*Type*
	Agreement Info	
id	Agreement ID. Unique identifier for each agreement	Integer
year	Year the agreement was declared, signed, or opened for signature	Date (YYYY)
title_full	Official, full, title of the agreement	String
title_short	Popular title of the agreement and commonly used abbreviations	String
agreement_profile_titile	Agreement titles used for amcdata.uu.se	String
description	One sentence describing the content of the agreement	Integer
primary_document	0.The document is not the primary document of the agreement 1.The document is the primary document of the agreement	String
primary_documents_attached	Documents attached to the primary document at signing	Integer
type_associated_document	Type of associated document: 0.Associated document adding to the primary document after signing 1.Associated document amending/updating the primary document after signing 2. Associated document formulating parallel obligations to a primary document specifically intended for nuclear-weapon states. 3. Other	String
type_associated_document _other	Other type of associated document	String
associated_document_attached_ primary	The primary document the associated document is attached to, full title	Integer
agreement_nature	The nature of the agreement: 0.The agreement did not explicitly supersede an earlier agreement 1.The agreement explicitly superseded an earlier agreement	String
superseded_agreement	The agreement that was superseded	Integer
primary_agreement_relationship	0.The primary agreement does not explicitly relate to the implementation of another, earlier agreement 1.The primary agreement explicitly relates to the implementation of another, earlier agreement	String
primary_agreement_relationship _other		Integer

region	Comment on the earlier agreement	
region_specific	0.The agreement is not region-specific 1.The agreement is region-specific	Integer
	The agreement-specific region: 0.Africa 1.Asia 2.Europe 3.The Americas 4.Antarctica	
nuclear_weapons_free_zone	0.African Nuclear-Weapon-Free Zone (ANWFZ) 1.Southeast Asian Nuclear Weapons Free Zone (SEANWFZ) 2.Central Asian Nuclear-Weapon-Free Zone (CANWFZ) 3.Latin America and the Caribbean Nuclear-Weapon-Free Zone (LANWFZ) 4. Antarctic Demilitarized Zone 5.South Pacific Nuclear-Weapon-Free Zone (SPNWFZ)	Integer
txt	0. The agreement/document is not available in full text 1. The agreement/document is available in full text	
	Signature, Entry into force, Agreement Parties and Participation	Integer
depositary	The depositary of the agreement	
laterality	0.Unilateral statement or declaration 1.Bilateral agreement, two states party to the agreement 2.Multilateral agreements, three or more states party to the agreement	String
agreement_format	Agreement format: 0.No explicitly regulated terms of entry into force 1.Attached document explicitly seen as integral part of agreement entered into force 2.Explicit entry into force upon signature 3.Explicit entry into force upon ratification (accession/succession/consent to be bound) of signature 4.Other	Integer
format_other	Other format	String
agreement_date	The date of agreement	Date (YYYY-MM-DD)
	Declaration	
declaration	The date of unilateral declaration	Date (YYYY-MM-DD)

Variable Name	*Content*	*Type*
	Adoption	
adoption_resolution	0.The agreement content was not adopted by resolution 1.The agreement content was adopted by resolution	Integer
resolution_forum	The forum of adoption by resolution	String
resolution_location	The location of adoption	String
adoption_date	The year, month, and day, the agreement was adopted	Date (YYYY-MM-DD)
	Agreement Reached (Signature of Agreement Reached)	
reached_agreement_date	Date of reached agreement (signature of agreement reached)	Date (YYYY-MM-DD)
	Agreement Signature	
signed_definitive_signature	The year, month, and day, of definitive signature	Date (YYYY-MM-DD)
open_for_signature_subject_to_ ratification	The year, month, and day, of opening of signature subject to ratification	Date (YYYY-MM-DD)
signature_location	The location(s) of agreement reached /definitive signature/opening for signature subject to ratification	String
	Signatory States	
nr_signatory_states	Number of signatory states to the agreement	Integer
signatory_states	Signatory states to the agreement in alphabetical order (date of signature in parenthesis)	String
signatory_states_gwno_id	Signatory states in the GWNO id system	String
signatory_states_alpha	Signatory states by abbreviated country names using ALPHA-3	String
	Entry into force	
country_specific_entry_ into_force	0.Entry into force does not require the ratification of one or more specified state 1.Entry into force requires the ratification of one or more specified state	Integer
country_specific_entry _into_force_countries	The state(s) ratification(s) required for entry into force of the agreement	String

country_specific_entry _into_force_countries_gwno_id	The state(s) ratification(s) required for entry into fore in the GWNO id system	String
nr_of_countries_specific _entry_into_force	0.Entry into force does not requires a specified set of numbers to ratify the agreement 1.Entry into force requires a specified set number of states to ratify the agreement	Integer
nr_of_countries_specific_entry_into_ force_nr	The number of states required for entry into force	String
entered_into_force	0.The agreement has not/never entered into force under agreement provisions 1.The agreement has entered/ entered into force under agreement provisions	Integer
entry_into_force_date	The year, month, and day, the agreement entered into force	Date (YYYY-MM-DD)
	Participants	
agreement_participants_nr	Number of states participating with the agreement	Integer
agreement_participants	Participating states in alphabetical order (date of signature or agreement reached/agreement reached in parenthesis)	String
agreement_participants	Participating states in the GWNO id system	String
agreement_participants_alpha	Participating states by abbreviated country names using ALPHA-3	String
	State-Parties by number	
nr_states_parties_total	Number of state-parties to the agreement by definitive signature, ratification, accession, acceptance, approval, succession or consent to be bound	Integer
nr_states_parties_ratification	Number of state-parties to the agreement by ratification	Integer
nr_states_parties_accession	Number of state-parties to the agreement by accession	Integer
nr_states_parties_approval	Number of state-parties to the agreement by approval	Integer
nr_states_parties_acceptance	Number of state-parties to the agreement by acceptance	Integer
nr_states_parties_succession	Number of state-parties to the agreement by succession	Integer
nr_states_party_consent_to _be_bound	Number of state-parties to the agreement by consent to be bound	Integer

Variable Name	*Content*	*Type*
	States parties by country	
states_parties_total	State-parties to the agreement by definitive signature, ratification, accession, acceptance, approval, succession or consent to be bound, in alphabetical order(date of definitive signature, ratification, accession, acceptance, approval, succession or consent to be bound in parenthesis)	String
states_parties_total_gwno_id	Total state-parties in the GWNO id system	String
states_parties_total_alpha	Total state-parties by abbreviated country names using ALPHA-3	String
states_parties_ratification	State-parties to the agreement by ratification, in alphabetical order of deposit to the depositary (date of ratification in parenthesis)	String
states_parties_ratification_gwno_id	State-parties by ratification in the GWNO id system	String
states_parties_ratification_alpha	State-parties by ratification by abbreviated country names using ALPHA-3	String
states_parties_accession	State-parties to the agreement by accession, in alphabetical order of deposit to the depositary (date of accession in parenthesis)	String
states_parties_accession_gwno_id	State-parties by accession in the GWNO id system	String
states_parties_accession_alpha	State-parties by accession by abbreviated country names using ALPHA-3	String
states_parties_approval	State-parties to the agreement by approval, in alphabetical order of deposit to the depositary (date of accession in parenthesis)	String
states_parties_approval_gwno_id	State-parties by approval in the GWNO id system	String
states_parties_approval_alpha	State-parties by approval by abbreviated country names using ALPHA-3	String
states_parties_acceptance	State-parties to the agreement by acceptance, in alphabetical order of deposit to the depositary (date of accession in parenthesis)	String
states_parties_acceptance_gwno_id	State-parties by acceptance in the GWNO id system	String
states_parties_acceptance_alpha	State-parties by acceptance by abbreviated country names using ALPHA-3	String

states_parties_succession	State-parties to the agreement by succession, in alphabetical order of deposit to the depositary (date of succession in parenthesis)	String
states_parties_succession_gwno_id	State-parties by succession in the GWNO id system	String
states_parties_succession_alpha	State-parties by succession by abbreviated country names using ALPHA-3	String
states_parties_consent_to_be_bound	State-parties to the agreement by consent to be bound, in alphabetical order of deposit to the depositary (date of accession in parenthesis)	String
states_parties_consent_to_be_bound_gwno_id	State-parties by consent to be bound in the GWNO id	String
states_parties_consent_to_be_bound_alpha	State-parties by consent to be bound by abbreviated country names using ALPHA-3	String
	Reservations	
agreement_subject_to_reservations	0.The agreement explicitly permits reservations to the agreement upon signature or ratification 1.The agreement explicitly forbids reservations to the agreement at any time 2.No mention of reservations	Integer
agreement_reservations_deposited	0. The agreement is not subject to one or more reservation upon signature or ratification 1.The agreement is subject to one or more reservation upon signature or ratification	Integer
reservation_states_signature	States having issued reservations upon signature of the agreement	String
reservation_states_ratification	States having issued reservations upon ratification of the agreement	String
	Amendments	
amendments	0.The agreement explicitly permits the amendment of the agreement 1.The agreement explicitly forbids the amendment of the agreement 2.No mention of amendment procedures	Integer

Variable Name	*Content*	*Type*
amendment_decision	Type of decision-making procedure for making amendments to the agreement: 0.Consencus of states parties/participants 1.Simple majority of states parties/participants 2.Two-thirds majority of states parties/participants 3.Biparty decision 4.Not specified 5.Other	Integer
amendment_decision_other	Other decision-making procedure for amendments	String
	Expiration	
expiration_type	Type of agreement duration: 0.Indefinate duration 1.Set date of expiration 2.Set number of years until expiration 3.Set date until expiration consultation 4.No mention of expiration 5.Other	Integer
expiration_date	Expiration date of the agreement	Date(YYYY)
expiration_number_years	The number of years the agreement is to remain in force/ until agreement expiration	String
expiration_consultation	The number of years until new expiration date is to be consulted on	String
expiration_consultation_outcome	The updated expiration after the first expiration consultation	String
expiration_type_other	Other expiration type	String
	Exit	
exit	0.The agreement permits for the withdrawal of a state-party/participant 1.The agreement forbids the withdrawal of a state-party/ participant 2.The agreement permits the withdrawal of a state-party/ participant under specified circumstances 3.No mention of withdrawal/exit 4.Other	Integer
exit_other	Other exit procedure	String

exit_notification	The time in advance notice of official withdrawal is to be given: 0.Three months 1.Six months 2.Twelve months 3.Twenty-four months 4.Not specified	String
	Agreement Status	
state_withdrawal_nr	Nr of states having formally withdrawn from an agreement in force as of December 2023	Integer
state_withdrawal	States having formally withdrawn from an agreement in force as of December 2023 (date of formal withdrawal in parenthisis)	String
state_withdrawal_gwno	States having formally withdrawn from an agreement in force as of December 2023 in the GWNO system	String
state_withdrawa_alphal	States having formally withdrawn from an agreement in force as of December 2023, abbrivated country names using ALPHA-3	String
s tatus	Status of the agreement as of Decemebr 2023 0.In force 1.Formally terminated 2.Formally expired 3.Obsolete 4.Never entered into force 5.Yet to enter into force	Integer
agreement_duration	Date of agreement termination	Date (YYYY-MM-DD)
	Obligations & Rights	
obligations_location_specific	0.All agreement obligations are not applied on a specified region/location 1.All agreement obligations are applied on a specified region/location	Integer
obligations_location	The specified location of application	String
obligations_domain_specific	0.All agreement obligations are not applied on a specified domain 1.All agreement obligations are applied on a specified domain	Integer
obligations_domain	The specified domain of application	String

Variable Name	*Content*	*Type*
	Weapon-specific obligations	
obligations_weapons_specific	0. The agreement does not apply obligations on one or more weapons, or related items/materials 1.The agreement applies obligations on one or more weapons, or related items/materials	Integer
weapons_item_topic	The general topic of weapon items regulated by agreement: 0.Nuclear weapons 1.Biological weapons 2.Chemical weapons 3.Conventional weapons 4.General	Integer
weapons_items_nr	The number of weapons/related items subject to obligations	Integer
weapons_items_specified	The item(s) subject to obligations	String
	Facility-specific obligations	
obligations_facilites	0.The agreement does not apply obligations on one or more facility 1.The agreement applies obligations on one or more facility	Integer
obligations_facilities_nr	The number of facilities subject to obligations	Integer
obligations_facilites_specified	The facilities subject to obligations	String
	General obligations	
general_obligations	0. The agreement does not outline one or more general obligation 1.The agreement outlines one or more general obligation	Integer
general_information_keeping	0. The agreement does not oblige states to record/retain records of the process of implementation. 1.The agreement obliges states to record/retain records of the process of implementation.	Integer
general_information_keeping_timeline	0. The agreement does not specify a timeline for the implementation of general information keeping 1.The agreement specifies a timeline for the implementation of general information keeping	Integer
general_information_keeping_ timeline_specified	The specified timeline	String

general_domestic_measures _adoption	0. The agreement does not oblige states to adopt and/or maintain domestic legislation/enforcement of domestic laws 1.The agreement obliges states to adopt and/or maintain domestic legislation/enforcement of domestic laws	Integer
general_domestic_measures _adoption_timeline	0. The agreement does not specify a timeline for the implementation of general domestic measures adoption 1.The agreement specifies a timeline for the implementation of general domestic measures adoption	Integer
general_domestic_measures _adoption_timeline_specified	The specified timeline	String
general_domestic_authorities _adoption	0. The agreement does not oblige states to adopt and/or maintain domestic authorities/points of contact/national agencies 1.The agreement obliges states to adopt and/or maintain domestic authorities/points of contact/national agencies	Integer
general_domestic_authorities _adoption_timeline	0. The agreement does not specify a timeline for the implementation of general domestic authority/agency adoption 1.The agreement specifies a timeline for the implementation of general domestic authority/agency adoption	Integer
general_domestic_authorities _adoption_timeline_specified	The specified timeline	String
general_agreement_adoption	0. The agreement does not oblige states to adopt/ sign a specified agreement for the sake of general implementation/verification of the agreement 1.The agreement obliges states to adopt/sign a specified agreement for the sake of general implementation/ verification of the agreement	Integer
general_agreement_adoption_timeline	0.The agreement does not specify a timeline for the implementation of general agreement adoption 1.The agreement specifies a timeline for the implementation of general agreement adoption	Integer
general_agreement_adoption_ timeline_specified	The specified timeline	String
general_assistance_positive	0. States are not obliged to assist other states parties/ associations with regards to the general implementation of the agreement 1.States are obliged to assist other states parties/ associations with regards to the general implementation of the agreement	Integer

Variable Name	*Content*	*Type*
general_assistance_positive _timeline	0.The agreement does not specify a timeline for the implementation of positive assistance 1.The agreement specifies a timeline for the implementation of positive assistance	Integer
general_assistance_positive _timeline_specified	The specified timeline	String
general_assistance_negative	0. States are not obliged to refrain from /prevent the assisting of other states parties towards the execution of prohibited activities 1.States are obliged obliged to refrain from /prevent the assisting of other states parties towards the execution of prohibited activities	Integer
general_assistance_negative _timeline	0.The agreement does not specify a timeline for the implementation of negative assistance 1.The agreement specifies a timeline for the implementation of negative assistance	Integer
general_assistance_negative _timeline_specified	The specified timeline	String
general_cooperation	0. States are not obliged to cooperate with other states parties/associations with regards to the general implementation of the agreement 1.States are obliged to cooperate with other states parties/associations with regards to the general implementation of the agreement	Integer
general_cooperation_timeline	0.The agreement does not specify a timeline for the implementation of general cooperation 1.The agreement specifies a timeline for the implementation of general cooperation	Integer
general_cooperation_timeline_ specified	The specified timeline	String
general_communication	0.States parties are not obliged to adopt and/or maintain general communication measures/technologies 1.States parties are obliged to adopt and/or maintain general communication measures/technologies	Integer
general_communication_ timeline	0.The agreement does not specify a timeline for the implementation of communication measures/ technologies 1.The agreement specifies a timeline for the implementation of communication measures/ technologies	Integer

general_communication_timeline_specified	The specified timeline	String
general_human_environmental_protection	0.The agreement does not oblige states to pursue/adopt/maintain general human/environmental protection or assistance 1.The agreement obliges states to pursue/adopt/maintain general human/environmental protection or assistance	Integer
general_protection_timeline	0.The agreement does not specify a timeline for the implementation of the general human/environmental protection 1.The agreement specifies a timeline for the implementation of the general human/environmental protection	Integer
general_protection_timeline_specified	The specified timeline	String
general_training_experience_exchange	0.The agreement does not oblige states to exchange training and experiences with regards to the general implementation of the agreement 1.The agreement obliges states to exchange training and experiences with regards to the general implementation of the agreement	Integer
general_training_experience_exchange_timeline	0.The agreement does not specify a timeline for the implementation of the general training and experience exchange 1.The agreement specifies a timeline for the implementation of the general training and experience exchange	Integer
general_training_experience_exchange_timeline_specified	The specified timeline	String
general_obligations_other	0.The agreement does not oblige states to pursue/adopt/maintain one ore more other general obligation 1.The agreement obliges states to pursue/adopt/maintain one or more other general obligation	Integer
c_general_obligations_other	Comment on the other general obligation(s)	String
	Rights	
rights	0.The agreement does not outline one or more explicit right 1.The agreement outlines one or more explicit right	Integer
c_rights	Comment on the right(s)	String

Variable Name	*Content*	*Type*
rights_parties	0.Agreement rights are applied to all state-parties 1.The agreement rights are applied to specified state-parties	Integer
rights_parties_specified	The specified parties	String
	Consultation & Control	
consultation_mechanism	0.The agreement does not establish one or more consultation mechanisms 1.The agreement establishes one or more consultation mechanisms	Integer
demonstrated_compliance _mechanism	0.The agreement does not establish one or more demonstrated compliance mechanisms 1.The agreement establishes one or more demonstrated compliance mechanisms	Integer
demonstrated_compliance _mechanism_nr	The number of demonstrated compliance mechanisms established by the agreement	Integer
verified_compliance_mechanism	0.The agreement does not establish one or more verified compliance mechanisms 1.The agreement establishes one or more verified compliance mechanisms	Integer
verified_compliance_mechanism_nr	The number of verified compliance mechanisms established by the agreement	Integer
	Agreement Associations	
agreement_association _established	0. The agreement does not establish the existence of one or more agreement association(s) 1.The agreement establishes the existence of one or more agreement association(s)	Integer
agreement_association _esablished_nr	The number of agreement associations established by agreement	Integer
agreement_association _established_title	The title(s) given to the state-party-association(s) established in the agreement	String
agreement_association _utilized	0. The agreement does not utilize one or more already existing association(s) 1.The agreement utilizes one or more already existing associations(s)	Integer
agreement_association _utlized_nr	The number of utilized association(s)	Integer
agreement_association _utlilized_title	The title(s) of the utilized association(s)	String

The Weapons & Facilites Dataset list of variables

Variable Name	*Content*	*Type*
agreement_id	Agreement ID. Unique identifier for each agreement	Integer
Item_letter	Letter A-Z, unique for each weapon item within a agreement	String
Item_number	Number 1-10, unique for each weapon item within a agreement	Integer
	Weapon item	
item_type	Type of item; 0.Weapons & ammunition 1.Facility 2.Materials/components 3.Other	Integer
Item_type_other	Other type of Item	String
weapon_item	The weapons-item with applied obligations	String
facility	The facility with applied obligations	String
weapon_item_definition	The weapon item as defined by the agreement	String
summary_category	0.The item is not a fictional summary category added by AMC Data 1.The item is a fictional summary category added by AMC Data	Integer
	Bans	
	Development ban	
ban_development	0.The agreement does not entail the ban of the development of the weapons-item 1.The agreement entails a ban on the development of the weapons-item	Integer
ban_development_execution_type	0.The ban does not specify an execution type 1.The ban specifies an execution type	Integer
ban_development_assistance_grant	0.States-parties are banned from granting assistance in relation to the phase 1.States-parties are banned from granting assistance in relation to the phase	Integer
ban_development_assistance_gain	0.States-parties are banned from gaining assistance in relation to the phase 1.States-parties are banned from gaining assistance in relation to the phase	Integer
ban_development__permission	0.States-parties are banned from permitting the phase in state-territory	Integer

	1.States-parties are banned from permitting the phase in state-territory	
ban_development_execution	0.states-parties are not banned from executing the phase 1.states-parties are banned from executing the phase	Integer
ban_development_party	0.The ban is not-party-specific 1.The ban is party-specific	Integer
ban_development_party _specific	Specific parties	String
	Testing ban	
ban_testing	0.The agreement does not entail a ban on the testing of the weapon 1.The agreement entails a ban on the testing of the weapon	Integer
ban_testing_deployed _execution_type	0.The ban does not specify an execution type 1.The ban specifies an execution type	Integer
ban_testing__assistance_grant	0.States-parties are banned from granting assistance in relation to the phase 1.States-parties are banned from granting assistance in relation to the phase	Integer
ban_testing_assistance_gain	0.States-parties are banned from gaining assistance in relation to the phase 1.States-parties are banned from gaining assistance in relation to the phase	Integer
ban_testing_permission	0.States-parties are banned from permitting the phase in state-territory 1.States-parties are banned from permitting the phase in state-territory	Integer
ban_testing_execution	0.states-parties are not banned from executing the phase 1.states-parties are banned from executing the phase	Integer
ban_testing_party	0.The ban is not-party-specific 1.The ban is party-specific	Integer
ban_testing_party_specific	Specific parties	String
	Production Ban	
ban_production	0.The agreement does not entail the ban of the production of the weapons-item 1.The agreement entails a ban on the production of the weapons-item	Integer
ban_production_execution_type	0.The ban does not specify en execution type 1.The ban specifies an execution type	Integer

Variable Name	*Content*	*Type*
ban_production_assistance_grant	0.States-parties are banned from granting assistance in relation to the phase 1.States-parties are banned from granting assistance in relation to the phase	Integer
ban_production__assistance_gain	0.States-parties are banned from gaining assistance in relation to the phase 1.States-parties are banned from gaining assistance in relation to the phase	Integer
ban_production_permission	0.States-parties are banned from permitting the phase in state-territory 1.States-parties are banned from permitting the phase in state-territory	Integer
ban_production_execution	0.states-parties are not banned from executing the phase 1.states-parties are banned from executing the phase	Integer
ban_production_party	0.The ban is not-party-specific 1.The ban is party-specific	Integer
ban_production_party_specific	Specific parties	String
ban_acquisition	Acquisition Ban 0.The agreement does not entail the ban of the acquisition of the weapons-item 1.The agreement entails the ban on the acquisition of the weapons-item	Integer
ban_acquisition_execution_type	0.The ban does not specify an execution type 1.The ban specifies an execution type	Integer
ban_acquisition_assistance_grant	0.States-parties are banned from granting assistance in relation to the phase 1.States-parties are banned from granting assistance in relation to the phase	Integer
ban_acquisition_assistance_gain	0.States-parties are banned from gaining assistance in relation to the phase 1.States-parties are banned from gaining assistance in relation to the phase	Integer
ban_acquisition_permission	0.States-parties are banned from permitting the phase in state-territory 1.States-parties are banned from permitting the phase in state-territory	Integer
ban_acquisition_execution	0.states-parties are not banned from executing the phase 1.states-parties are banned from executing the phase	Integer
ban_acquisition_party	0.The ban is not-party-specific	Integer

	1.The ban is party-specific	
ban_acquisition_party _specific	Specific parties	String
ban_possession	General possession Ban 0.Agreement obligations do not distinguish between non-deployed and deployed weapons-item-possession and relate to weapons-possession in a general sense 1.Agreement obligations distinguish between non-deployed and deployed weapons-item-possession	Integer
ban_possession_general	0.The agreement does not entail a ban on the general possession of the weapons-item 1.The agreement entails a ban on the general possession of the weapons-item	Integer
ban_possesion_general_execution_ type	0.The ban does not specify an execution type 1.The ban specifies an execution type	Integer
ban_possession_general_assistance_ grant	0.States-parties are banned from granting assistance in relation to the phase 1.States-parties are banned from granting assistance in relation to the phase	Integer
ban_possession_general_assistance_ gain	0.States-parties are banned from gaining assistance in relation to the phase 1.States-parties are banned from gaining assistance in relation to the phase	Integer
ban_possession_general_permission	0.States-parties are banned from permitting the phase in state-territory 1.States-parties are banned from permitting the phase in state-territory	Integer
ban_possession_general_execution	0.states-parties are not banned from executing the phase 1.states-parties are banned from executing the phase	Integer
ban_possession_party	0.The ban is not-party-specific 1.The ban is party-specific	Integer
ban_possession_party _specific	Specific parties	String
ban_possession_non_deployed	Non-deployed possession Ban 0.The agreement does not entail the ban of the non-deployed possession of the weapons-item 1.The agreement entails the ban of the non-deployed possession of the weapons-item	Integer
ban_possession_nondeployed_ execution_type	0.The ban does not specify an execution type 1.The ban specifies an execution type	Integer

Variable Name	*Content*	*Type*
ban_possession_nondeployed _assistance_grant	0.States-parties are banned from granting assistance in relation to the phase 1.States-parties are banned from granting assistance in relation to the phase	Integer
ban_possession_nondeployed _assistance_gain	0.States-parties are banned from gaining assistance in relation to the phase 1.States-parties are banned from gaining assistance in relation to the phase	Integer
ban_possession_nondeployed _permission	0.States-parties are banned from permitting the phase in state-territory 1.States-parties are banned from permitting the phase in state-territory	Integer
ban_possession_nondeployed _execution	0.states-parties are not banned from executing the phase 1.states-parties are banned from executing the phase	Integer
ban_possession_non_deployed _party	0.The ban is not-party-specific 1.The ban is party-specific	Integer
ban_possession_non_deployed _party_specific	Specific parties	String
	Deployed possession Ban	
ban_possession_deployed	0.The agreement does not entail the ban of the deployed possession of the weapons-item 1.The agreement entails a ban of the deployed possession of the weapons-item	Integer
ban_possession_deployed _execution_type	0.The ban does not specify an execution type 1.The ban specifies an execution type	Integer
ban_possession_deployed _assistance_grant	0.States-parties are banned from granting assistance in relation to the phase 1.States-parties are banned from granting assistance in relation to the phase	Integer
ban_possession_deployed _assistance_gain	0.States-parties are banned from gaining assistance in relation to the phase 1.States-parties are banned from gaining assistance in relation to the phase	Integer
ban_possession_deployed _permission	0.States-parties are banned from permitting the phase in state-territory 1.States-parties are banned from permitting the phase in state-territory	Integer
ban_possession_deployed _execution	0.states-parties are not banned from executing the phase 1.states-parties are banned from executing the phase	Integer

ban_possession_deployed_party	0.The ban is not-party-specific 1.The ban is party-specific	Integer
ban_possession_deployed_party _specific	Specific parties	String
	Transfer Ban	
ban_transfer	0.The agreement does not entail a ban on the transfer the weapons-item 1.The agreement entails a ban on the transfer of the weapons-item	Integer
ban_transfer_deployed _execution_type	0.The ban does not specify an execution type 1.The ban specifies an execution type	Integer
ban_transfer_assistance_grant	0.States-parties are banned from granting assistance in relation to the phase 1.States-parties are banned from granting assistance in relation to the phase	Integer
ban_transfer_assistance_gain	0.States-parties are banned from gaining assistance in relation to the phase 1.States-parties are banned from gaining assistance in relation to the phase	Integer
ban_transfer__permission	0.States-parties are banned from permitting the phase in state-territory 1.States-parties are banned from permitting the phase in state-territory	Integer
ban_transfer_execution	0.states-parties are not banned from executing the phase 1.states-parties are banned from executing the phase	Integer
ban_transfer_party	0.The ban is not-party-specific 1.The ban is party-specific	Integer
ban_transfer_party _specific	Specific parties	String
	Station Ban	
ban_stationing	0.The agreement does not entail a ban on the stationing of the weapon 1.The agreement entails a ban on the stationing of the weapon	Integer
ban_stationing_deployed _execution	0.The ban does not specify an execution type 1.The ban specifies an execution type	Integer
ban_stationing_assistance_grant	0.States-parties are banned from granting assistance in relation to the phase 1.States-parties are banned from granting assistance in relation to the phase	Integer

Variable Name	*Content*	*Type*
ban_stationing_assistance_gain	0.States-parties are banned from gaining assistance in relation to the phase 1.States-parties are banned from gaining assistance in relation to the phase	Integer
ban_stationing_permission	0.States-parties are banned from permitting the phase in state-territory 1.States-parties are banned from permitting the phase in state-territory	Integer
ban_stationing_execution	0.states-parties are not banned from executing the phase 1.states-parties are banned from executing the phase	Integer
ban_stationing_party	0.The ban is not-party-specific 1.The ban is party-specific	Integer
ban_stationing_party _specific	Specific parties	String
	Use Ban	
ban_use	0.The agreement does not entail a ban on the use of the weapon 1.The agreement entails a ban on the use of the weapon	Integer
ban_use_deployed_execution_type	0.The ban does not specify an execution type 1.The ban specifies an execution type	Integer
ban_use_assistance_grant	0.States-parties are banned from granting assistance in relation to the phase 1.States-parties are banned from granting assistance in relation to the phase	Integer
ban_use_assistance_gain	0.States-parties are banned from gaining assistance in relation to the phase 1.States-parties are banned from gaining assistance in relation to the phase	Integer
ban_use_permission	0.States-parties are banned from permitting the phase in state-territory 1.States-parties are banned from permitting the phase in state-territory	Integer
ban_use_execution	0.states-parties are not banned from executing the phase 1.states-parties are banned from executing the phase	Integer
ban_use_party	0.The ban is not-party-specific 1.The ban is party-specific	Integer
ban_use_party_specific	Specific parties	String

	Disposal Ban	
ban_disposal	0.The agreement does not entail a ban on the disposal of the weapon 1.The agreement entails a ban on the disposal of the weapon	Integer
ban_disposal_deployed _execution_type	0.The ban does not specify an execution type 1.The ban specifies an execution type	Integer
ban_disposal_assistance_grant	0.States-parties are banned from granting assistance in relation to the phase 1.States-parties are banned from granting assistance in relation to the phase	Integer
ban_disposal_assistance_gain	0.States-parties are banned from gaining assistance in relation to the phase 1.States-parties are banned from gaining assistance in relation to the phase	Integer
ban_disposal_permission	0.States-parties are banned from permitting the phase in state-territory 1.States-parties are banned from permitting the phase in state-territory	Integer
ban_disposal_execution	0.states-parties are not banned from executing the phase 1.states-parties are banned from executing the phase	Integer
ban_disposal_party	0.The ban is not-party-specific 1.The ban is party-specific	Integer
	Specific parties	String
	Restrictions	
	Development restriction	
ban_disposal_party_specific	0.The agreement does not entail a restriction on the development of the weapons-item 1.The agreement entails a restriction on the development of the weapons-item	Integer
restriction_development	0.The restriction is not-party-specific 1.The restriction is party-specific	Integer
restriction_development_party	Specific parties	String
restriction_development _party_specific	0.The restriction is not location-specific 1.The restriction is location-specific	Integer
restriction_development_location	Specific location	String
restriction_development _location_specific	0.The restriction is not facility-specific 1.The restriction is facility-specific	Integer

restriction_development_facility	Specific facility	String
restriction_development _facility_specific	0.The restriction is not quality-specific 1.The restriction is quality-specific	Integer
restriction_development _quality	0.The quality-restriction does not relate to the practice of parties in executing the phase with regards to the weapon 1. The quality-restriction relates to the practice of parties in executing the phase with regards to the weapon	Integer
development_quality_practice	The specified practice(s)	String
development_quality_practice _specified	0.The quality-restriction does not relate to the capability of the weapon with regards to executing the phase 1.The quality-restriction relates to the capability of the weapon with regards to executing the phase	Integer
development_quality_capability	The specified capability	String
development_quality_capability _specified	0.The restriction is not quantity-specific 1.The restriction is quantity-specific	Integer
restriction_development_quantity restriction_development _quantity_type	Type of quantity: 0.Sole quantity 1.Aggregated quantity 2.Aggregated throw weight 3.Other	Integer
restriction_development_quantity _type_other	Other quantity type	String
restriction_development _quantity_specific	Specific quantity	String
restriction_development_item _counting	If specified, how one item is counted by the agreement	String
restriction_development_item _counting_point	The point at which the weapons-item is counted by the agreement	String
restriction_testing	Testing restriction 0.The agreement does not entail a restriction on the testing of the weapons-item 1.The agreement entails a restriction on the testing of the weapons-item	Integer
restriction_testing_party	0.The restriction is not-party-specific 1.The restriction is party-specific	Integer
restriction_testing_party_specific	Specific parties	String

restriction_testing_location	0.The restriction is not location-specific 1.The restriction is location-specific	Integer
restriction_testing_location_specific	Specific location	String
restriction_testing_facility	0.The restriction is not facility-specific 1.The restriction is facility-specific	Integer
restriction_testing_facility_specific	Specific facility	String
restriction_testing_quality	0.The restriction is not quality-specific 1.The restriction is quality-specific	Integer
testing_quality_practice	0.The quality-restriction does not relate to the practice of parties in executing the phase with regards to the weapon 1. The quality-restriction relates to the practice of parties in executing the phase with regards to the weapon	Integer
testing_quality_practice _specified	The specified practice(s)	String
testing_quality_capability	0.The quality-restriction does not relate to the capability of the weapon with regards to executing the phase 1.The quality-restriction relates to the capability of the weapon with regards to executing the phase	Integer
testing_quality_capability _specified	The specified capability	String
restriction_testing_quantity	0.The restriction is not quantity-specific 1.The restriction is quantity-specific	Integer
restriction_testing_quantity_type	Type of quantity: 0.Sole quantity 1.Aggregated quantity 2.Aggregated throw weight 3.Other	Integer
restriction_testing_quantity_specific	Specific quantity	String
restriction_testing_quantity _type_other	Other quantity type	String
restriction_testing_item _counting	If specified, how one item is counted by the agreement	String
restriction_testing_item _counting_point	The point at which the weapons-item is counted by the agreement	String

restriction_production	Production restriction 0.The agreement does not entail the restriction of the production of the weapons-item 1.The agreement entails a restriction on the production of the weapons-item	Integer
restriction_production_party	0.The restriction is not-party-specific 1.The restriction is party-specific	Integer
restriction_production_party_specific	Specific parties	String
restriction_production_location	0.The restriction is not location-specific Specific location 1.The restriction is location-specific	Integer
restriction_production_location_specific	Specific location	String
restriction_production_facility	0.The restriction is not facility-specific 1.The restriction is facility-specific	Integer
restriction_production_facility_specific	Specific facility	String
restriction_production_quality	0.The restriction is not quality-specific 1.The restriction is quality-specific	Integer
production_quality_practice	0.The quality-restriction does not relate to the practice of parties in executing the phase with regards to the weapon 1. The quality-restriction relates to the practice of parties in executing the phase with regards to the weapon	Integer
production_quality_practice_specified	The specified practice(s)	String
production_quality_capability	0.The quality-restriction does not relate to the capability of the weapon with regards to executing the phase 1.The quality-restriction relates to the capability of the weapon with regards to executing the phase	Integer
production_quality_capability_specified	The specified capability	String
restriction_production_quantity_specific	0.The restriction is not quantity-specific 1.The restriction is quantity-specific	Integer
restriction_production_quantity_type	Type of quantity: 0.Sole quantity 1.Aggregated quantity 2.Aggregated throw weight 3.Other	Integer

restriction_production_ quantity_type_other	Other quantity type	String
restriction_production _quantity_specified	Specific quantity	String
restriction_production_item _counting	If specified, how one item is counted by the agreement	String
restriction_production_item _counting_point	The point at which the weapons-item is counted by the agreement	String
restriction_acquisition	Acquisition restriction 0.The agreement does not entail the restriction on the acquisition of the weapon 1.The agreement entails a restriction on the acquisition of the weapon	Integer
restriction_acquisition_party	0.The restriction is not-party-specific 1.The restriction is party-specific	Integer
restriction_acquisition_party _specific	Specific parties	String
restriction_acquisition_location	0.The restriction is not location-specific 1.The restriction is location-specific	Integer
restriction_acquisition_location _specific	Specific location	String
restriction_acquisition_facility	0.The restriction is not facility-specific 1.The restriction is facility-specific	Integer
restriction_acquisition_facility _specific	Specific facility	String
restriction_acquisition_quality	0.The restriction is not quality-specific 1.The restriction is quality-specific	Integer
acquisition_quality_practice	0.The quality-restriction does not relate to the practice of parties in executing the phase with regards to the weapon 1. The quality-restriction relates to the practice of parties in executing the phase with regards to the weapon	Integer
acquisition_quality_practice _specified	The specified practice(s)	String
acquisition_quality_capability	0.The quality-restriction does not relate to the capability of the weapon with regards to executing the phase 1.The quality-restriction relates to the capability of the weapon with regards to executing the phase	Integer

Variable Name	*Content*	*Type*
acquisition_quality_capability _specified	The specified capability	String
restriction_acquisition _quantity_specific	0.The restriction is not quantity-specific 1.The restriction is quantity-specific	Integer
restriction_acquisition _quantity_type	Type of quantity: 0.Sole quantity 1.Aggregated quantity 2.Aggregated throw weight 3.Other	Integer
restriction_acquisition_ quantity_type_other	Other quantity type	String
restriction_acquisition _quantity_specified	Specific quantity	String
restriction_acquisition_item _counting	If specified, how one item is counted by the agreement	String
restriction_acquisition_item _counting_point	The point at which the weapons-item is counted by the agreement	String
restriction_possession	General possession restriction 0.Agreement obligations do not distinguish between non-deployed and deployed weapons-item-possession and relate to weapons-possession in a general sense 1.Agreement obligations distinguish between non-deployed and deployed weapons-item-possession	Integer
restriction_possession_general	0.The agreement does not entail the restriction on the general possession of the weapons-item 1.The agreement entails a restriction on the general possession of the weapons-item	Integer
restriction_possession_party	0.The restriction is not-party-specific 1.The restriction is party-specific	Integer
restriction_possession_party _specific	Specific parties	String
restriction_possession_location	0.The restriction is not location-specific 1.The restriction is location-specific	Integer
restriction_possession_location _specific	Specific location	String
restriction_possession_facility	0.The restriction is not facility-specific 1.The restriction is facility-specific	Integer

restriction_possession_facility _specific	Specific facility	String
restriction_possession_quality	0.The restriction is not quality-specific 1.The restriction is quality-specific	Integer
possession_quality_practice	0.The quality-restriction does not relate to the practice of parties in executing the phase with regards to the weapon 1. The quality-restriction relates to the practice of parties in executing the phase with regards to the weapon	Integer
	The specified practice(s)	String
possession_quality_practice _specified possession_quality_capability	0.The quality-restriction does not relate to the capability of the weapon with regards to executing the phase 1.The quality-restriction relates to the capability of the weapon with regards to executing the phase	Integer
possession_quality_capability _specified	The specified capability	String
restriction_possession_quantity	0.The restriction is not quantity-specific 1.The restriction is quantity-specific	Integer
restriction_possession _quantity_type	Type of quantity: 0.Sole quantity 1.Aggregated quantity 2.Aggregated throw weight 3.Other	Integer
restriction_possession _quantity_type_other	Other quantity type	String
restriction_possession _quantity_specified	Specific quantity	String
restriction_possession_item _counting	If specified, how one item is counted by the agreement	String
restriction_possession_item _counting_point	The point at which the weapons-item is counted by the agreement	String
restriction_possession_non_ deployed	Non-deployed possession restriction 0.The agreement does not entail the restriction on the non-deployed possession of the weapons-item 1.The agreement entails a restriction on the non-deployed possession of the weapons-item	Integer
restriction_possession_non_ deployed_party	0.The restriction is not-party-specific 1.The restriction is party-specific	Integer

Variable Name	*Content*	*Type*
restriction_possession_non_deployed_party_specific	Specific parties	String
restriction_possession_non_deployed_location	0.The restriction is not location-specific 1.The restriction is location-specific	Integer
restriction_possession_non_deployed_location_specific	Specific location	String
restriction_possession_non_deployed_facility	0.The restriction is not facility-specific 1.The restriction is facility-specific	Integer
restriction_possession_non_deployed_facility_specific	Specific facility	String
restriction_possession_non_deployed_quality	0.The restriction is not quality-specific 1.The restriction is quality-specific	Integer
possession_non_deployed_quality_practice	0.The quality-restriction does not relate to the practice of parties in executing the phase with regards to the weapon 1. The quality-restriction relates to the practice of parties in executing the phase with regards to the weapon	Integer
possession_non_deployed_quality_practice_specified	The specified practice(s)	String
possession_non_deployed_quality_capability	0.The quality-restriction does not relate to the capability of the weapon with regards to executing the phase 1.The quality-restriction relates to the capability of the weapon with regards to executing the phase	Integer
possession_non_deployed_quality_capability_specified	The specified capability	String
restriction_possession_non_deployed_quantity	0.The restriction is not quantity-specific 1.The restriction is quantity-specific	Integer
restriction_possession_non_deployed_quantity_type	Type of quantity: 0.Sole quantity 1.Aggregated quantity 2.Aggregated throw weight 3.Other	Integer
restriction_possession_non_deployed_quantity_type_other	Other quantity type	String
restriction_possession_non_deployed_quantity_specific	Specific quantity	String
restriction_possession_non_deployed_item_counting	If specified, how one item is counted by the agreement	String

restriction_possession_non _deployed_item_counting_point	The point at which the weapons-item is counted by the agreement	String
restriction_possession_deployed	Deployed possession restriction 0.The agreement does not entail a restriction on the deployed possession of the weapons-item 1.The agreement entails a restriction on the deployed possession of the weapons-item	Integer
restriction_possession_deployed _party	0.The restriction is not-party-specific 1.The restriction is party-specific	Integer
restriction_possession_deployed _party_specific	Specific parties	String

restriction_possession_deployed _location_specific	Specific location	String
restriction_possession_deployed _facility	0.The restriction is not facility-specific 1.The restriction is facility-specific	Integer
restriction_possession_deployed _facility_specific	Specific facility	String
restriction_possession_deployed _quality	0.The restriction is not quality-specific 1.The restriction is quality-specific	Integer
possession_deployed_quality_ practice	0.The quality-restriction does not relate to the practice of parties in executing the phase with regards to the weapon 1. The quality-restriction relates to the practice of parties in executing the phase with regards to the weapon	Integer
possession_deployed_quality_ practice_specified	The specified practice(s)	String
possession_deployed_quality_ capability	0.The quality-restriction does not relate to the capability of the weapon with regards to executing the phase 1.The quality-restriction relates to the capability of the weapon with regards to executing the phase	Integer
possession_non_deployed_quality_ capability_specified	The specified capability	String
restriction_possession_deployed _quantity	0.The restriction is not quantity-specific 1.The restriction is quantity-specific	Integer

Variable Name	*Content*	*Type*
restriction_possession_deployed _quantity_type	Type of quantity: 1.Sole quantity 2.Aggregated quantity 3.Aggregated throw weight 4.Other	Integer
restriction_possession_deployed _quantity_type_other	Other quantity type	String
restriction_possession_deployed _quantity_specific	Specific quantity	String
restriction_possession_deployed _item_counting	If specified, how one item is counted by the agreement	String
restriction_possession_deployed _item_counting_point	The point at which the weapons-item is counted by the agreement	String
restriction_transfer	Transfer restriction 0.The agreement does not entail a restriction on the transfer of the weapon-item 1.The agreement entails a restriction on the transfer of the weapons-item	Integer
restriction_transfer_party	0.The restriction is not-party-specific 1.The restriction is party-specific	Integer
restriction_transfer_party _specific	Specific parties	String
restriction_transfer_location	0.The restriction is not location-specific 1.The restriction is location-specific	Integer
restriction_transfer_location _specific	Specific location	String
restriction_transfer_facility	0.The restriction is not facility-specific 1.The restriction is facility-specific	Integer
restriction_transfer_facility _specific	Specific facility	String
restriction_transfer_quality	0.The restriction is not quality-specific 1.The restriction is quality-specific	Integer
transfer_quality_practice	0.The quality-restriction does not relate to the practice of parties in executing the phase with regards to the weapon 1. The quality-restriction relates to the practice of parties in executing the phase with regards to the weapon	Integer
transfer_quality_practice_specified	The specified practice(s)	String

transfer_quality_capability	0.The quality-restriction does not relate to the capability of the weapon with regards to executing the phase 1.The quality-restriction relates to the capability of the weapon with regards to executing the phase	Integer
transfer_quality_capability_specified	The specified capability	String
restriction_transfer_quantity	0.The restriction is not quantity-specific 1.The restriction is quantity-specific	Integer
restriction_transfer_quantity_type	Type of quantity: 0.Sole quantity 1.Aggregated quantity 2.Aggregated throw weight 3.Other	Integer
restriction_transfer_quantity_type_other	Other quantity type	String
restriction_transfer_quantity_specific	Specific quantity	String
restriction_transfer_item_counting	If specified, how one item is counted by the agreement	String
restriction_transfer_item_counting_point	The point at which the weapons-item is counted by the agreement	String
restriction_stationing	Station restriction 0.The agreement does not entail the restriction of the stationing of the weapons-item 1.The agreement entails a restriction on the stationing of the weapons-item	Integer
restriction_stationing_party	0.The restriction is not-party-specific 1.The restriction is party-specific	Integer
restriction_stationing_party_specific	Specific parties	String
restriction_stationing_location	0.The restriction is not location-specific 1.The restriction is location-specific	Integer
restriction_stationing_location_specific	Specific location	String
restriction_stationing_facility	0.The restriction is not facility-specific 1.The restriction is facility-specific	Integer
restriction_stationing_facility_specific	Specific facility	String

Variable Name	*Content*	*Type*
restriction_stationing_quality	0.The restriction is not quality-specific 1.The restriction is quality-specific	Integer
station_quality_practice	0.The quality-restriction does not relate to the practice of parties in executing the phase with regards to the weapon 1. The quality-restriction relates to the practice of parties in executing the phase with regards to the weapon	Integer
station_quality_practice_specified	The specified practice(s)	String
station_quality_capability	0.The quality-restriction does not relate to the capability of the weapon with regards to executing the phase 1.The quality-restriction relates to the capability of the weapon with regards to executing the phase	Integer
station_quality_capability_specified	The specified capability	String
restriction_stationing_quantity	0.The restriction is not quantity-specific 1.The restriction is quantity-specific	Integer
restriction_stationing_quantity_type	Type of quantity: 0.Sole quantity 1.Aggregated throw weight 2.Aggregated quantity 3.Other	Integer
restriction_stationing_ quantity_type_other	Other quantity type	String
restriction_stationing _quantity_specific	Specific quantity	Integer
restriction_stationing_item _counting	If specified, how one item is counted by the agreement	String
restriction_stationing_item _counting_point	The point at which the weapons-item is counted by the agreement	String
restriction_use	Use restriction 0.The agreement does not entail a restriction on the use of the weapons-item 1.The agreement entails a restriction on the use of the weapons-item	Integer
restriction_use_party	0.The restriction is not-party-specific 1.The restriction is party-specific	Integer
restriction_use_party _specific	Specific parties	String
restriction_use_location	0.The restriction is not location-specific 1.The restriction is location-specific	Integer

restriction_use_location _specific	Specific location	String
restriction_use_facility	0.The restriction is not facility-specific 1.The restriction is facility-specific	Integer
restriction_use_facility_specific	Specific facility	String
restriction_use_quality	0.The restriction is not quality-specific 1.The restriction is quality-specific	Integer
use_quality_practice	0.The quality-restriction does not relate to the practice of parties in executing the phase with regards to the weapon 1. The quality-restriction relates to the practice of parties in executing the phase with regards to the weapon	Integer
use_quality_practice_specified	The specified practice(s)	String
use_quality_capability	0.The quality-restriction does not relate to the capability of the weapon with regards to executing the phase 1.The quality-restriction relates to the capability of the weapon with regards to executing the phase	Integer
use_quality_capability_specified	The specified capability	String
restriction_use_quantity	0.The restriction is not quantity-specific 1.The restriction is quantity-specific	Integer
restriction_use_quantity_type	Type of quantity: 0.Sole quantity 1.Aggregated quantity 2.Aggregated throw weight 3.Other	Integer
restriction_use_quantity _type_other	Other quantity type	String
restriction_use _quantity_specific	Specific quantity	String
restriction_use_item_counting	If specified, how one item is counted by the agreement	String
restriction_use_item _counting_point	The point at which the weapons-item is counted by the agreement	String
restriction_disposal	Disposal restriction 0.The agreement does not entail a restriction on the disposal of the weapons-item 1.The agreement entails a restriction on the disposal of the weapons-item	Integer

Variable Name	*Content*	*Type*
restriction_disposal_party	0.The restriction is not-party-specific 1.The restriction is party-specific	Integer
restriction_disposal_party _specific	Specific parties	String
restriction_disposal_location	0.The restriction is not location-specific 1.The restriction is location-specific	Integer
restriction_disposal_location _specific	Specific location	String
restriction_disposal_facility	0.The restriction is not facility-specific 1.The restriction is facility-specific	Integer
restriction_disposal_facility _specific	Specific facility	String
restriction_disposal_quality	0.The restriction is not quality-specific 1.The restriction is quality-specific	Integer
disposal_quality_practice	0.The quality-restriction does not relate to the practice of parties in executing the phase with regards to the weapon 1. The quality-restriction relates to the practice of parties in executing the phase with regards to the weapon	Integer
disposal_quality_practice_specified	The specified practice(s)	String
disposal_quality_capability	0.The quality-restriction does not relate to the capability of the weapon with regards to executing the phase 1.The quality-restriction relates to the capability of the weapon with regards to executing the phase	Integer
disposal_quality_capability_specified	The specified capability	String
restriction_disposal_quantity	0.The restriction is not quantity-specific 1.The restriction is quantity-specific	Integer
restriction_dispoal_quantity_type	Type of quantity: 0.Sole quantity 1.Aggregated quantity 2.Aggregated throw weight 3.Other	Integer
restriction_disposal_quantity _type_other	Other quantity type	String
restriction_disposal _quantity_specific	Specific quantity	String
restriction_disposal_item _counting	If specified, how one item is counted by the agreement	String

restriction_disposal_item _counting_point	The point at which the weapons-item is counted by the agreement	String
	Procedures for elimination, conversion and Modernization	
elimination	0.The agreement does not specify procedures for the dismantlement/destruction/elimination of the weapon-item 1.The agreement specifies procedures for the dismantlement/destruction/elimination of the weapon-item	Integer
elimination_procedure	The specified procedure for dismantlement/destruction/ elimination of the weapon-item	String
conversion	0.The agreement does not specify procedures for the conversion of the weapon-item 1.The agreement specifies procedures for the conversion of the weapon-item	Integer
conversion_procedure	The specified procedure for conversion of the weapon-item	String
modernization	0.The agreement allows for the modernization of the weapon-item 1.The agreement does not allow for the modernization of the weapon-item 2.no mention	String
modernization_other	Other modernization	Integer
	Facility-specific obligations	
facility-destruction	0.The type of facility/facility is not to be destroyed 1.The type of facility/facility is to be destroyed	Integer
facility_destruction_specified	Comment on destruction	String
facility_conversion	0.The type of facility/facility is not to be converted 1.The type of facility/facility is to be converted	Integer
facility_conversion_specified	Comment on conversion	String
facility_use	0.The type of facility is not restricted to a particular use/ content 1.The type of facility is restricted to a particular use/ content	Integer
facility_use_specified	Comment on use	String

Variable Name	*Content*	*Type*
	Time frame	
obligation_timeframe_type	Time after entry into force obligations are to be fulfilled: 0.Directly upon entry into force 1.Set time after entry into force 2.Other	Integer
timeframe_set_time	Number of days, months or years after which obligations are to be fulfilled	String
obligations_timeframe_other	Other obligations time frame	String
timeframe_phases	0.Obliations are not to be fulfilled in phases 1.Obligations are to be fulfilled in phases	Integer
phases_number	Nr of phases	Integer
timeframe_obligations_extention	0.The agreement allows for extension of implementing obligations under specified circumstances 1.The agreement does not allow for extension of implementing obligations under any specified circumstances 2.No mention	Integer
timeframe_obligations_extention_specified	Comment on circumstances when an extension is allowed	String
	Exceptions	
exeptions	0.The agreement does not outline one or more exception(s) to agreement obligations(the weapon) 1.The agreement outlines one or more exception(s) to agreement obligations	Integer
exeptions_specified	The specified exceptions	String

The Consultation Dataset list of variables

Variable Name	*Content*	*Type*
agreement_id	Agreement ID. Unique identifier for each agreement	
consultation_letter_id	Letter A-Z, unique for each mechanism within a agreeement	String
mechanism_type	Administrative filter for amcdp.uu.se: 0.Consultation mechanism 1.Demonstrated compliance mechanism 2.Verified compliance mechanism	Intger
	Procedural Components	
consultation_forum	The forum for consultation; 0.Agreement forum 1.Party-to-Party 2.Diplmatic channels 3.Other	Integer
consultation_forum_other	Other forum for consultation	String
consultation_agreement_forum	The one or more specified forum(s) the mechanism takes place	String
party_consultation_referral	0.The consultation mechanism can explicitly be referred to a third party 1.The consultant mechanism can not explicitly be referred to a third party	Integer
party_consultation_referral_third _party	The third party the consultation mechanism is referred to	String
	Substantial components	
consultation_category	Category of consultation mechanism; 0.Operations and Maintenance consultation 1.Dispute and Ambiguity consultation	Integer
consultation_type	Type of consultation mechanism: 0.Implementation consultation 1.Review consultation 2.Amendment consultation 3.Withdrawal consultation 4.Technologies/improvement consultation 5.Extraordinary/special consultation 6.Party-dispute consultation 7.Interpretation-dispute consultation 8.Compliance-dipsute consultation 9.Other consultation	Integer

The Demonstrated Compliance Mechanism Dataset
list of variables

agreement_id	Agreement ID. Unique identifier for each agreement	Integer
demonstrated_compliance_ mechanism_mechanism_letter	Letter A-Z, unique for each mechanism within a agreeement	String
demonstrated_compliance_ mechanism_number	Number 1-100, unique for each mechanism within a agreeement	Integer
mechanism_type_administrative_filter	Administrative filter for amcdp.uu.se: 0.Consultation mechanism 1.Demonstrated compliance mechanism 2.Verified compliance mechanism	Integer
	Procedural Components	
demonstrated_compliance _mechanism_initiation	The time after entry into force the demonstrated compliance mechanism is initiated; 0.Directly upon entry into force 1.Set time after entry into force 2.Other	Integer
demonstrated_compliance _mechanism_initiation_set_time	The set time after entry into force	String
demonstrated_compliance_ mechanism_initiation other	Other initiation	String
demonstrated_compliance _mechanism_initiation_date	Date of mechanism initiation	Date(YYYY-MM-DD)
demonstrated_compliance_ mechanism_duration	The duration of the demonstrated compliance mechanism: 0.Set time 1.Obligations timeline 2.Agreement duration 3.Other	Integer
demonstrated_compliance _mechanism_duration_other	Other duration	String
demonstrated_compliance_ mechanism_date	Date of mechanism completion	Date(YYYY-MM-DD)
demonstrated_compliance _ mechanism_forum	The forum for demonstrated compliance: 0.Party to party 1.Party to agreement-established association 2.Party to utilized association 3.Other	Integer
demonstrated_compliance _mechanism_forum_established_ associatio	The agreement-established association	String

demonstrated_compliance _mechanism_forum_utlized_ association	The utilized association	String
demonstrated_compliance__ mechanism_forum_other	Other type of forum	String
demonstrated_compliance mechanism_trigger_type	Type of mechanism trigger; 0.Agreement 1.State-party action 2.State-party request 3.Circumstance 4.Agreement association 5.Other	Integer
demonstrated_compliance mechanism_trigger_agreement	Type of agreement trigger; 0.One time 1.Oouta 2.Cyclical 3.Continous	Integer
demonstrated_compliance mechanism_trigger_agreement_quota	Size of quota	String
demonstrated_compliance mechanism_trigger_agreement _cyclical	Time in between cyclical demonstrated compliance	String
demonstrated_compliance mechanism_trigger__circumstance	The circumstance triggering the mechanism	String
demonstrated_compliance mechanism_trigger__association	The association triggering the mechanism	Strinng
	Substantial components	
demonstrated_compliance _mechanism_compliance	Type of demonstration; 0.Compliance demonstration 1.Transparency demonstration	Integer
demonstrated_compliance_ mechanism_category	Format of demonstrated compliance mechanism; 0.Report 1.Information-submission 2.Infromation-exchange 3.Notification-submission 4.Other	String
demonstrated_compliance_ mechanism_category_other	Other format	String

demonstrated_compliance mechanism_type	Type of demonstrated compliance mechanism objective: 0.Initiated compliance 1.Updated compliance 2.Challenged compliance 3. Other	Integer
demonstrated_compliance mechanism_objective_other	Other type or objective	String
notification_objective	The objective of the mechanism objective 0.Intended 1.Initiated 2.Completed 3.Immediate	Integer
	Demonstrated Compliance Submission Contents	
demonstrated_compliance_ mechanism_development	0. The contents of the demonstrated compliance mechanism does not include development-phase information 1.The contents of the demonstrated compliance mechanism include development-phase information	Integer
demonstrated_compliance_ mechanism_development_submission	The information provided under the developments phase	String
demonstrated_compliance_ mechanism_testing	0. The contents of the demonstrated compliance mechanism does not include testing-phase information 1.The contents of the demonstrated compliance mechanism include testing-phase information	Integer
demonstrated_compliance_ mechanism__testing_submission	The information provided under the testing phase	String
demonstrated_compliance_ mechanism_production	0. The contents of the demonstrated compliance mechanism does not include production-phase information 1.The contents of the demonstrated compliance mechanism include production-phase information	Integer
demonstrated_compliance_ mechanism_production_submission	The information provided under the production phase	String
demonstrated_compliance_ mechanism_acquiring	0. The contents of the demonstrated compliance mechanism does not include acquisition-phase information 1.The contents of the demonstrated compliance mechanism include acquisition-phase information	Integer
demonstrated_compliance_ mechanism_acquiring_submission	The information provided under the acquisition phase	String

demonstrated_compliance_ mechanism_possession	0. The contents of the demonstrated compliance mechanism does not include possession-phase information 1.The contents of the demonstrated compliance mechanism include possession-phase information	Integer
demonstrated_compliance_ mechanism_possession_submission	The information provided under the possession phase	String
demonstrated_compliance_ mechanism_stationing	0. The contents of the demonstrated compliance mechanism does not include stationing-phase information 1.The contents of the demonstrated compliance mechanism include stationing-phase information	Integer
demonstrated_compliance_ mechanism_stationing_submission	The information provided under the stationing phase	String
demonstrated_compliance_ mechanism_transfer	0. The contents of the demonstrated compliance mechanism does not include transferring-phase information 1.The contents of the demonstrated compliance mechanism include transferring-phase information	Integer
demonstrated_compliance_ mechanism_transfer_submission	The information provided under the transferring phase	String
demonstrated_compliance_ mechanism_use	0. The contents of the demonstrated compliance mechanism does not include use-phase information 1.The contents of the demonstrated compliance mechanism include use-phase information	Integer
demonstrated_compliance_ mechanism_use_submission	The information provided under the use phase	String
demonstrated_compliance_ mechanism_disposal	0. The contents of the demonstrated compliance mechanism does not include disposal-phase information 1.The contents of the demonstrated compliance mechanism include disposal-phase information	Integer
demonstrated_compliance_ mechanism_disposal_submission	The information provided under the disposal phase	String
demonstrated_compliance_ mechanism_general	0. The contents of the demonstrated compliance mechanism does not include general/unspecified implementation information 1.The contents of the demonstrated compliance mechanism include general/unspecified implementation information	Integer
demonstrated_compliance_ mechanims_general_submission	The information provided under the implementation phase	String

demonstrated_compliance_mechanism_amc_typology	AMC Typlopgy Mechanism definition given AMC Consultation & Control Typology	String
		Integer

The Verified Compliance Mechanism Dataset list of variables

agreement_id	Agreement ID. Unique identifier for each agreement	String
mechanism_letter	Letter A-Z, unique for each mechanism within a agreeement	Integer
verified_compliance_mechanism_ number	Number 1-100, unique for each mechanism within a agreeement	Integer
verified_compliance_mechanism_type	Administrative filter for amcdp.uu.se: 0.Consultation mechanism 1.Demonstrated compliance mechanism 2.Verified compliance mechanism	Integer
	General Components	
verified_compliance_mechanism_ initiation	The time after entry into force the verified compliance mechanism is first initiated; 0.Directly upon entry into force 1.Set time after entry into force 2.Other	String String
verified_compliance_mechanism_ initiation_set_time	The set time after entry into force	Date(YYYY-MM-DD)
verified_compliance_mechanism_ initiation_other	Other initiation	Integer
verified_compliance_mechanism_ initiation_date	Date of mechanism initiation	
verified_compliance_mechanism_ duration	The duration of the verified compliance mechanism: 0.Set time 1.Obligations timeline 2.Agreement duration 3.Other	String Sting
verified_complinace_mechanism_ duration_set	The set duration of the mechanism	Date(YYYY-MM-DD)
verified_complinace_mechanism_ duration_ other	Other duration	Integer
verified_complinace_mechanism_ duration_ date	Date of mechanism completion	
verified_compliance_mechanism _trigger_type	Type of mechanism trigger; 0.Agreement 1.State-party notification 2.State-party request 3.Circumstance 4.Agreement association 5.Other	Integer

verified_compliance_mechanism_ agreement_trigger	Type of agreement trigger: 0.One time 1.Oouta 2.Cyclical 3.Continous	String String
verified_compliance_mechanism agreement_trigger_qouta	Size of quota	String
verified_compliance _mechanism_ agreement_trigger_cyclical	Time in between cyclical verified compliance	String
verified_compliance _mechanism_ agreement_trigger_upon_notification	Notification triggering the mechanism	String
trigger_circumstance	The circumstance triggering the mechanism	Integer
trigger_association	The agreement association triggering the mechanism	String
verified_compliance_trigger_other	Other type of mechanism trigger	String
	Substantial components	
verified_compliance_mechanism_ category	Type of verified compliance mechanism; 0.NTMs 1.Display 2.Remote monitoring 3.In-person exhibition 4.In-person demonstration 5.In-person Inspection 6.In-person monitoring 7.Other	Integer Integer
verified_compliance_mechanism_ category_other	Other category	Integer
verified_compliance_mechanism_type	Type of verified compliance mechanism: 0.initiated compliance 1.Updated compliance 2.Challenged compliance 3.Completed compliance 4.Other	 String Integer
verified_compliance_mechanism_ area_access	0.The verifying party does not have access to a specified location/area during inspection 1.The verifying party has access to a specified location/ area during inspection	 String
verified_compliance_mechanism_area	Territories/areas accessible to the inspecting party	Integer

verified_compliance_mechanism_ facility_access	0.The verifying party does not have access to a specified facility/type of facility during inspection 1.The verifying party has access to a specified facility / type of specified facility during inspection	String Integer
verified_compliance_mechanism_ facility	Facility/type of facility accessible to the inspecting party	String
verified_compliance_mechanism_ item_access	0.The verifying party does not have access to a specified item/type of item during inspection 1.The verifying party has access to a specified item/type of item during inspection	Integer
verified_compliance_mechanism_item	Items/objects accessible to the inspecting party	String
verified_compliance_mechanism_ item_section_access	0.The verifying party does not have access to specified sections/parts of an item during inspection 1.The verifying party has access to specified sections/ parts of an item during inspection	Integer
verified_compliance_mechanism_ item_section	Specific parts/sections of item accessible for the inspecting party	String
verified_compliance_mechanism_ territory	Territory with inspection access; 0.State-party territory 1.State-party territory and basing countries 2.Other	Integer
verified_compliance_mechanism _territory_other	Other territory	String
verified_compliance_mechanism _inspector_type	The type of inspector; 0.Party on party 1.Agreement-established association 2.Utilized association 3.Other	Integer
verified_compliance_mechanism _inspector_type_established _association	The agreement-established association	String
verified_compliance_mechanism _inspector_type_utlized_association	The utilized association	Integer
verified_compliance_mechanism _inspector_other	other inspector	String
verified_compliance_mechanism_ development	0. The mechanism does not entail access to another state-party's development of a weapon 1.The mechanism entails access to another state-party's development of a weapon	Integer

verified_compliance_mechanism _development_access	The access under the developments phase	String
verified_compliance_mechanism_ testing	0. The mechanism does not entail access to another state-party's testing of a weapon 1.The mechanism entails access to another state-party's testing of a weapon	Integer
verified_compliance_mechanism_ testing_access	The access under the testing phase	String
verified_compliance_mechanism_ production	0. The mechanism does not entail access to another state-party's production of a weapon 1.The mechanism entails access to another state-party's production of a weapon	Integer
verified_compliance_mechanism_ production_access	The access under the production phase	String
verified_compliance_mechanism_ acquisition	0. The mechanism does not entail access to another state-party's acquisition of a weapon 1.The mechanism entails access to another state-party's development of a weapon	Integer
verified_compliance_mechanism_ acquisition_access	The access under the acquisition phase	String
verified_compliance_mechanism_ possession	0. The mechanism does not entail access to another state-party's development of a weapon 1.The mechanism entails access to another state-party's possession of a weapon	Integer
verified_compliance_mechanism_ possession_access	The access under the possession phase	String
verified_compliance_mechanism_ stationing	0. The mechanism does not entail access to another state-party's stationing of a weapon 1.The mechanism entails access to another state-party's stationing of a weapon	Integer
verified_compliance_mechanism_ stationing_access	The access under the stationing phase	String
verified_compliance_mechanism_ transfer	0. The mechanism does not entail access to another state-party's transfer of a weapon 1.The mechanism entails access to another state-party's transfer of a weapon	Integer
verified_compliance_mechanism_ tranfer_access	The access under the transfer-phase	String

verifed_compliance_mechanism_use	0. The mechanism does not entail access to another state-party's use of a weapon 1.The mechanism entails access to another state-party's use of a weapon	Integer
verified_compliance_mechanism_use_access	The access under the use phase	String
verified_compliance_mechanism_disposal	0. The mechanism does not entail access to another state-party's disposal of a weapon 1.The mechanism entails access to another state-party's disposal of a weapon	Integer
verified_compliance_mechanism_disposal_access	The access under the disposal phase	String
verified_compliance_mechanism_implementation	0. The mechanism does not entail access to another state-party's general/unspecified implementation of a weapon 1.The mechanism entails access to another state-party's general/unspecified implementation of a weapon	Integer
verified_compliance_mechanism_implemetation_access	The access under the general implementation phase	Integer
	NTMs	
ntm_interference	0.The agreement does not entail a specific mention of non-interference with NTMs 1.The agreement entails a specific mention of non-interference with NTMs	Integer
ntm_concealment	0.The agreement does not entail a specific mention of non-concealment with NTMs 1.The agreement entails a specific mention of non-concealment with NTMs	Integer
	AMC Typlopgy	
veriffied_compliance_mechanism_amc_typology	Mechanism definition given AMC Consultation & Control Typology	String

The Agreement Associations Dataset variable list

Variable Name	*Content*	*Type*
	Agreement Association information	
association_type	Type of agreement association; 0.State-party assembly 1.State-party assembly sub-organ 2.State-party organization 3.Non-state-party organization 4.Other	Integer
association_type_other	Other type of association	String
association_origin	The origin of the agreement association; 0.Established association 1.Utilized association	Integer
utlizied_association _agreement_origin	The agreement originally establishing the agreement, if the utilized association originates from another agreement	String
forum_sub_session	Type of forum session; 0.The forum is not an explicit sub-session of a primary/ regular forum 1.The forum is the explicit sub-session of a primary/ regular forum	Integer
forum_sub_session_regular	The forum constituting the primary/regular session	String
	Association duration	
association_duration	The explicit duration of the agreement association; 0.The association is not of limited duration 1.The association is of limited duration	Integer
association_limited_duration	The duration of the agreement association	String
	State-party composition	
state_party_composition	Type of state-party composition; 0.General state-party composition 1.Rotating state-party composition 2.Elected state-party composition 3.Set non-elected state-party composition 4.Other 5.Not explicitly specified	Integer
state_party_composition_other	Other composition	String
representative_type	The type of state-party representative; 0.Unspecified representatives 1.Foreign Minister 2.Senior Official 3.Other	Integer

rotating_composition_nr	Nr of state-parties the association is composed of in any given term	Integer
rotating_composition_term	The longevity of one term of rotating composition	String
elected_composition_nr	Nr of elected state-parties the body is composed of	Integer
elected_composition_term	The longevity of one term of elected representation	String
election_procedure	The procedure for elected representation	String
set_non_elected_composition_nr	Nr of state-parties the body is composed of	Integer
set_non_elected_composition_states	State-parties represented in the body	String
	Appointed composition	
sub_organ_composition_nr	Nr of individuals the sub organ is composed of	Integer
sub_organ_composition_persons	Type of persons appointed to the sub-organ	String
sub_organ_appointed _composition	Assembly/assembly-representative appointing the composition of the sub organ	String
	Staffed composition	
organization_ size	Size of the organization/ nr or staff	Integer
	Forum assembly	
assembly_ initial	0.The agreement does not specify procedures for the initial assembly of the forum 1.The agreement specifies procedures for the initial assembly of the forum	Integer
assembly_initial_specified	Time after entry into force of initial assembly	String
assembly_conveener_intial	Individual/assembly/organization convening the assembly given specified procedures for assembly	String
assembly_forum_general	Procedure for general assembly into forum; 0.Upon necessity 1.Upon cycle 2.Upon state-party request 3.Upon supported state-party request(remove) 4.Upon specified circumstance/event 5.Upon assembly/organization direction 6.Other	Integer

Variable Name	*Content*	*Type*
assembly_forum_cycle	Length of cycle for assembly; 0.Every two months 1.Every three months 2.Annual 3.Bi-annual 4.4 years 5.5 years 6.6 years	Integer
assembly_forum_assembly	The assembly directing assembly into forum	String
assembly_forum _event	Specified event directing assembly into forum	String
assembly_state_party_support	Additional state-party support needed for the assembly into forum; 0.Seconded by a simple majority of state parties 1.Seconeded by two-thirds of states parties 2.Seconded by two state parties 3.Other	Integer
assembly_state_party_support_time	Nr of days before which state-parties have to submit expression of assembly support	Integer
assembly_deadline	0. The agreement does not entail a cyclical deadline of assembly into forum given assembly has not occurred by other conditions in a specified time 1.The agreement entails a cyclical deadline of assembly into forum given assembly has not occurred by other conditions in a specified time	Integer
assembly_deadline_time	The specified time after which the forum assembles given assembly has not occurred by other conditions	String
assembly_additional_inter _session	The assembly can be convened in inter- session upon state-party request	String
assembly_conditions_ _decision	0. The assembly procedures does not contain explicit disclaimer of additional assembly, or alternations of assembly conditions, as the state-party assembly decides 1.The assembly procedures contain explicit disclaimer of additional assembly, or alternations of assembly conditions, as the state-party assembly decides	Integer
assembly_convener_general	Individual/assembly/organization convening the assembly into forum given specified procedures	String
	Sub-organ appointer	
sub_organ_appointer	The state-party assembly appointing the sub-organ	String

	Association chair/leadership	
association_leadership	0.Elected Chair/leader 1.Rotating Chair/leader 2.Set Chair/leader 3.Appointed Chair/Leader 4.Other 5.No mention of assembly Chair/leader	Integer
assembly_leadership_other	Other type of leadership structure	String
assembly_leadership_elected	The longevity of one term of the elected chair/leader	String
assembly_leadership_election	The process of electing the chair/leader	String
assembly_chair_rotating	The longevity of one term of the rotating chair/leader	String
assembly_chair_set	Set chair/leader upon agreement	String
assembly_chair_appointed	The association appointing the chair/leader	String
	Decision-making	
association_decision _making_general	0.The agreement does not explicitly regulate a general decision-making procedure for the association 1.The agreement explicitly regulates a general decision-making procedure for the association	Integer
association_decision_ _making_general_type	Type of general decision-making procedure; 0.Consencus 1.Consencus, if failed: two-thirds majority 2.Two-thirds majority 3.Majority 4.Other 5.No mention of general decision-making procedure	Integer
association_decision making_ general_other	Other decision-making procedure	String
association_decision _making_specified	0. The agreement does not specify specific decision-making procedures for one or more specific process or substance 1.The agreement specifies specific decision-making procedures for one or more specific process or substance	Integer
association_decision _making_specified_processes	Additional decision-making procedures for specified processes, other than general	String

	Association reporting	
association_reporting	Reporting procedure to other associations/organizations; 0.The association is set to report to a third party 1.The association is set to report to another agreement association 2.Other 3.No mention	Integer
association_reporting_third_party	The third party being reported to	String
association_reporting _association	The agreement association being reported to	String
association_reporting_other	Other reporting procedure(s)	String
forum_conclusion_report _adoption	0.The forum does not adopt a session/report 1.The forum adopts a session conclusion/report	Integer
	Association location	
assembly_location	Type of state-party-assembly location: 0.Set location upon agreement 1.Rotating location 2.No Mention	Integer
assembly_location_set	Set location upon agreement	String
assembly_location_rotation	Procedure for rotating location	String
organization_hq	Location of the organization's headquarters	String
	Assembly quorum	
assembly_qourom	State-party presence needed to constitute a quorum; 0.Full composition 1.Two thirds of composition 2.Majority of composition 3.Half Composition 4.No explicit mention 5.Other	Integer
assembly_quorum_other	Other quorum	String
	Assembly observers	
assembly_observers	0.The assembly is explicitly open to civil society observation upon invitation 1.The assembly is explicitly not open to civil society observation upon invitation 2.No mention of civil society observation 3.Other	Integer

assembly_observers_other	Other observation	String
assembly_nuclear_states _observers	0.The assembly is explicitly open for observation by nuclear weapons states 1.The assembly is explicitly no open for observation by nuclear weapon states 2.No mention of observation by nuclear weapons states	Integer
	Promotion	
promotion_mandate	0.The association is not appointed one or more agreement promotion mandate(s) 1.The association is appointed one or more agreement promotion mandate(s)	Integer
promotion_mandate_general	0.The association is not appointed a general promotion mandate 1.The association is appointed a general promotion mandate	Integer
promotion_mandate_administrative	0.The association is not given an administrative promotion mandate 1.The association is given an administrative promotion mandate	Integer
promotion_mandate_assistance	0.The association is not given an assistance promotion mandate 1.The association is given an assistance promotion mandate	Integer
promotion_mandate_agreement_ information	0.The association is not given an agreement information promotion mandate 1.The association is given an agreement information promotion mandate	Integer
	Facilitation	
facilitation_mandate	0.The association is not appointed one or more facilitation mandate(s) 1.The association is appointed one or more agreement facilitation mandate(s)	Integer
facilitation_mandate_consultation	0.The agreement does not facilitate one or more consultation mechanism(s) 1.The agreement facilitates one or more consultation mechanism(s)	Integer
facilitation_mandate_consultation_ ,mechanism	The consultation mechanism(s) facilitated by the association	String

facilitation_mandate_demonstrated_compliance	0.The agreement does not facilitate one or more demonstrated compliance mechanism(s) 1.The agreement facilitates one or more demonstrated compliance mechanism(s)	Integer
facilitation_mandate_demonstrated_compliance_mechanism	The demonstrated compliance mechanism(s) facilitated by the association	String
facilitation_mandate_verified_compliance	0.The agreement does not facilitate one or more verified compliance mechanism(s) 1.The agreement facilitates one or more verified compliance mechanism(s)	Integer
facilitation_mandate_verified_compliance_mechanism	The demonstrated compliance mechanism(s) facilitated by the association	String
	Direction	
direction_mandate	0.The association is not appointed one or more direction mandate(s) 1.The association is appointed one or more agreement direction mandate(s)	Integer
direction_mandate_consultation	0.The agreement does not direct one or more consultation mechanism(s) 1.The agreement directs one or more consultation mechanism(s)	Integer
direction_mandate_consultation_,mechanism	The consultation mechanism(s) directed by the association	String
direction_mandate_demonstrated_compliance	0.The agreement does not direct one or more demonstrated compliance mechanism(s) 1.The agreement directs one or more demonstrated compliance mechanism(s)	Integer
direction_mandate_demonstrated_compliance_mechanism	The demonstrated compliance mechanism(s) directed by the association	String
direction_mandate_verified_compliance	0.The agreement does not direct one or more verified compliance mechanism(s) 1.The agreement directs one or more verified compliance mechanism(s)	Integer
direction_mandate_verified_compliance_mechanism	The demonstrated compliance mechanism(s) directed by the association	String

Annex I: List of Observations in the Agreement data set in Chronological order

Primary instruments _ 58
Attached documents _ 16
Total observations _ 84
